SUBJECT INDEX

January–December, 1954

In using this index, look under specific subjects. If information wanted is not under specific subject, look under a broader heading. Wherever possible, look under specific *processes*. For example, information on the dyeing of cotton will be under DYEING—cotton (*not* under COTTON—Dyeing). For fiber information not involving specific processes (as properties, etc.), look under the names of fibers. Use cross references and look also at other headings beginning with the same word (the cross references do not repeat such headings) as DYEING, DYEING MACHINERY AND EQUIPMENT, DYEING METHODS, DYEING THEORY, DYES. For many processes there will be separate headings for machinery, as DRAWING and DRAWING MACHINERY. P indicates a patent reference.

ABACA, 138
ABRASION
  fabrics: apparatus testing abrasion flexing and creasing, P130
    developing abrasion tests, 25
    German tester, 337
    Hycar-sized denim, 376
    resistance of cotton/nylon blends, 198
    resistance testing, 26
    Taber abraser: evaluation of constant-tension-mounting device, 209
    testing, 25
    testing machine, P460
    treatment to increase abrasion resistance, P509
  fibers: abrasion resistance of cellulose acetate increased by heat or inert solvent treatment, 269
    behavior of 14 textile materials, 45, 475
    testing resistance, 26
  yarns: behavior of 14 textile materials, 45, 475
    testing using abrading ring and ballooning action of up-drawn yarn, P129
ACETATE RAYON: acetate crimped yarn: type C, 432
  blistering of cellulose acetate in chloroform, 539
  cellulose acetate as a raw material for rayon production, 187
  fabric with loop effect for wool-like suiting, 294
  fiber study with electron microscope, 163
  high electrical resistance little affected by atmospheric conditions, 269
  manufacture, 171
  novel crepe, 524
  suitability as insulator, 269
  tensile behavior of yarn, 25
ACRYLIC FIBERS: dyeable, resin-modified, P503
  hi-bulk Acrilan yarn for outerwear, 475
  identification reactions, 309
  improving dyeing properties, 6
  method for differentiating between Orlon types 41, 42, 81 and Acrilan, 532
  Orlon: use in full-fashioned sweaters, 429
  production of fibers of high strength, 283
  reactivity and detection of polyacrylic compounds, 445
  Redon: properties, etc., 234
ACRYLONITRILE, 31 (see also *Acrylic fibers, Cotton, Chemically modified*)
AIR CONDITIONING, P116, 266, 538
ALGINATE FIBERS, 470
AMILAN, 7
ANNUAL REVIEWS: chemical engineering fundamentals, 215
  dyes, 491
  fats, oils and soaps 1953, 214, 268
  fibers 1954, 471
  machinery developments 1953, 28, 111
  manufacture of man-made fibers 1953, 43
  production of man-made fibers in U.S., 469
  research 1953 achievements, 76
  sewage, waste treatment, and water pollution 1953 213, 311
ANNUAL REVIEWS (*continued*)
  textile research and development 1953, 216
  wet processing of man-made fibers 1953, 103, 156
ANTI-FELTING, see *Shrinkproofing*.
ANTI-STATIC AGENTS, 113, 269 (see also *Chemical aids to processing, Static electricity*)
  anti-static agents for acetate, 534
  anti-static effect of carbon black in roller burnishing paint, 519
  application to dielectrics, P179
  list of agents, 450
  mechanisms of anti-static action, 269
  non-durable agents Zelec NE and Zelec NK, 250
  problems in removing anti-static agents from B-type Perlon, 249
  processing yarns, etc., P454
  selection and evaluation, 344
  surface treatment of thermoplastic materials, P545
  treatment of fabrics, 199, P125, P317
  treatment of synthetic fiber materials, P179, P180, P508
APPLICATORS (see also *Chemical aids to processing*)
  applying conditioning liquid to moving web, P125
  device for applying liquid to sheets or webs, P37
  lubrication of rayon filament yarns, 290
  spraying oil or water on textiles, P451
ARDIL, 411; protein extraction processes from groundnuts, 284
  quantitative determination in admixture with wool, 445
AUXILIARIES, see *Textile chemicals, Chemical aids to processing, Dyes*, etc.
BALING AND PACKING MACHINERY
  apparatus for packing fibrous materials, P349
  baling apparatus for man-made fibers, P315
  machine for force feeding and stuffing compacted fibrous materials into casings, P541
  press box, P451
BALLOONS: automatic control, P504
  control: theory, 288
  dynamical analysis, 420
  effect of air-drag on ballooning during spinning, 367
  effect of cap-edge friction on size and shape, 192
  preventing formation, P453
  relation between friction, traveler, and balloon diameter, 239
  ring frames: anti-ballooning appliance, P453
  torsional phenomena; cap spinning; with stroboscope, 49
BAST FIBERS (see also *Flax, Hemp, Jute, Sisal*)
  identification of undyed bast and leaf fibers, 440
  measurement of torsional rigidity on strands of bast and hard fibers, 476
  production, P503
  treated yarns: equal wet and dry strengths, P80
BEAMING, see *Warping*.
BEAMS, see *Looms, Warping machinery*.

dyeing behavior of Orlon, Dacron, Terylene, Dynel, Acrilan, X-51, 438
fats, oils and soaps, 214
fiber friction, 363
finishing 1950-1953 (book), 531
fireproofing patents, 296
materials handling films, 446
oxidation of cotton kier wastes, 392
phase microscopy, 1950-1954, 536
resin finishing, 481
selected industrial films: textiles, 395
sewage, waste treatment and water pollution 1953, 213
textile chemicals, 448
textile quality control 1952-53, 212
textile research and development 1953, 216
zein, 140
BLEACHING (see also *Ultrasonics*)
chemistry: theory, 17
chlorite, new procedure using superheated steam, 378
continuous bleaching range, 331
continuous open width, 377
corrosion inhibition in chlorite bleaching, P545
cotton, 377, 513
hydrogen peroxide: protein fibers, 156
kinetics of chlorine-active compounds, 483
knit goods bleaching range, 250
nylon type 670: peracetic acid, 104
optical, 104, 253
behavior on cellulose, 199
bleaching agents, 250, 483
Orlon, 333
polyamide fibers: potassium permanganate, 432
pressure, 107
process, P84
sodium chlorite, 104
sodium peroxide, 104
wool, P39, P180
treatment with formaldehyde before bleaching, 297
BLENDING (see also *Opening*)
Ardil, 194
cotton dyed red, blue and left natural: mill test, 423
cotton/nylon, 423
fluorescent and undyed fibers, P119
problems, 147, 153
silo blending for carpet stock, 521
uneven mixing by doubling in drawing, 50
wool: centriblender, 190
German process, 190
rotary, 190
sandwich mix, 96
two-machine 4-bin system, 190
wool bed, 50
in woolen opening, 476
wool/man-made fibers, 476
wool/nylon on worsted system, 424
BLENDING MACHINERY, P35 (see also *Opening machinery*)
Dodd blending feeder and single process range, 472
Rando-feeder, 364
Rando-webber, 364
wool, P173
BLENDS, (see also *Abrasion* and under specific processes)
acetate, 194
coarse-denier, 423
complementary nature of fibers from natural and synthetic polymers, 151
Dacron/Orlon/rayon, 330
effect of varying fiber length, 519
fiber placement, 423
BLENDS (*continued*)
nylon, 290, 422
nylon and rayon open weave shirting, P226
piece dyed mixture fabric from regenerated and acetate fiber, 524
synthetic fibers: combination fabrics for industry, 153
synthetic fibers: decorative fabrics, 152
testing: comparison of sulfuric acid and sodium hydroxide methods for the analysis of wool mixed with cotton and viscose rayon, 494
Dynel inner structure technique, 208
natural/synthetic blends, 151
rayon in wool blends, 68
regenerated proteins in wool blends, 335
viscose in cotton/viscose blends, 532
Vinylon, Amilan, wool and cotton: quantitative analysis, 388
wool content by cystine analysis, 532
theory, 96, 423
volumetric analysis, 50
viscose/cotton, 240
wool/acrylic serges, 292
wool/synthetic: varying fiber and composition, 15
worsted greys, 524
BOBBINS, P223, P272, P315, P397, P504, P542 (see also *Reels*)
conical paper, P121
delivering to spindles, P220
devices for changing in spinning, P117
flanged, P121
handling mechanism, P78, P176
holder arrangement in spinning, P316, P504
looms: changing mechanism, P81, P82, P224, P316
low denier acetate threads, P122, P176
manufacture, P399
packing mechanism, P176
polythene, P504
porous resilient, P127
rotatable braking devices, P80
Saco-Lowell lifter, 49
strippers, P80, P125, P398, P459, 522
support, P127, P220, P276, P398
two-piece, P272
winding spool, P505
yarn shipping core, P37
BONDING, see *Nonwoven fabrics, Yarns.*
BRAIDING: braids, structure and properties, 15
haul-off methods, 198
technology, 56
tubular, 152
BRAIDING MACHINERY, P124, P352
braiding accessories, 479
fancy braiders, 198
Hobourn braiders, 376
Maypole braider, 56
solid cord, high speed, and Fraser, 247
BUILDINGS, see *Mills.*
CALENDERS, P402; McKiernan-Terry multi purpose, 160
mounting for rolls, P460
CARBONIZING: wool, 21
CARDING (see also *Combing, Neps, Sliver, Uniformity*)
air currents, 8, 365
card fillet technique, 324
control charts, 8
cotton: checklist, 472
cotton-card efficiency, 472
defects: causes and elimination, 517
effect of worker speed, 93
flat cards for staple fibers, 237
fly, 8
high speed movies, 364
improvements, 324
increasing efficiency, 141
maintenance forms, 237

CARDING (*continued*)
reversing motion of the flats, 190
theory, 9, 285, 517
Uster tester in card room, 109
wool, 237, 287
cylinder-doffer ratios, 472
wool/man-made fibers, 517
CARDING MACHINERY, P397 (see also *Combing machinery, Sliver*)
cleaning, P451; Weco vacuum stripping system for cotton cards, 286
clothing: care, 286, 416
metallic, 48, 140, 324
saw-toothed wire, 237
condenser tapes, P397
control rolls, 141
cotton: defective operation of flat card, 8, 365
cylinder shafts mounting, P35
drive: variable speed fancy, 472
feed roll mounting, P35
feeders: compensating weighing faults, P349
fillet, P217
fly prevention, P349
Haigh-Bonser web clearer, 286
hopper feed mechanism, P77, P218
maintenance, 472
pressure rollers, P217
roller bearing comb box, 141
roller cards for synthetic fibers, 286
stripping: continuous, 324, 472
cylinder stripping, P349
roller stripping, P77
vacuum stripping, P77, 286
top flat card, 517
waste carding, 92
weighing device, 517
wool
84-inch card, 472
composition rub aprons, 9
CARPETS: Axminster, 294
backsizing, 52
chenille, P274
chenille yarns in latex-backed, P226
felted, using cut-out units, 481
jacquard, P456
loop pile, P226
manufacture, P223, P459
pile, P179, P508
pile wire for carpet loom, P177
spool Axminster loom, P123, P225
stretchable, P459
thermoplastic-backed, P125
tufted, P125, P458
rayon and nylon staple, 525
Wilton, 152, P275, 294
wire tapestry loom, P81
CASEIN FIBERS: Fibrolane, Merinova, and Caslen, 91
tensile properties, 470
water uptake, 412
CELLULOSE (see also under specific fibers and processes)
adsorption and diffusion of direct dyes in cellulose fibers, 214
alkylation, 341
carboxyl groups and thermal degradation, 448
cellulose III, 499
cellulose IV, 394
degree of polymerization
determination methods, 32, 33, 172, 341
distribution, 499
detection of oxy- and hydrocelluloses in rayon and cotton, 70
dissolution in cupriethylene-diamine solution, 393
electron microscope study of cellulose fibers in ultra-
CELLULOSE (*continued*)
thin sections after treatment with thallous ethylate, 304
hydrogen bonding, 268
hydrolysis, 342, 394
impregnating bath for cellulose fibers, P126
intermicellar system in cellulose fibers, 189
iodine adsorption method as measure of crystallinity, 500
isotropic, 414
oxycellulose: absorption of chrysophenine G, 32
particle properties of crystalline regions, 414
relaxation of stress in stretched cellulose fibers, 165, 336
research at Shirley Institute on modified cotton celluloses, 268
structure, 33, 539
swelling powers of urea solutions, 450
theory of the adhesion of high polymers to cellulose, 312
variation in lattice spacing, 215
CHEESES, see *Winding*.
CHEMICAL AIDS TO PROCESSING (see also *Anti-static agents, Applicators, Detergents, Friction, Silicones, Sizing agents*)
application of N-(hydroxymethylene) adipamide to wool fabrics, 57
colloidal silicon and titanium oxides for rayon and synthetic fibers, P397
conditioning composition, P509
laboratory test for scourability of spinning oils, 210
lubricant, P180
lubricating regenerated cellulose yarns, P353
lubrication of filaments, 84, P318
methyl bornoxy oil sprayed on cotton, 415
oiling fibers: mill laboratory control, 71
oiling wool: German process, 190
oiling wools, man-made fibers, and blends on worsted system, 520
oils for hosiery fibers, 246
petroleum surface-active-agent in spinning, 52
silica treatment of textiles, P546
standard methods for removal, 496
treating with aqueous suspension of silicon dioxide or titanium oxide, P509
use with man-made fibers, 233
wool oils, 285
CHEMICAL ENGINEERING: annual review of fundamentals, 215
mixing: unit operations report, 267
CHEMICALS, see *Textile chemicals*.
CHEMISTRY (see also *Cellulose, Polymers and polymerization, Radioactive tracers, Textile chemicals* and specific processes)
anomalies in colorimetric pH measurement, 307
chemical industry and textiles in Europe, 187
colorimetric and volumetric procedures for determining titanium in textiles, 535
colorimetric analytical methods for detection of metal traces in acetate textile industry, 27
determination of chromium using diphenyl carbazide, 27
micro test for formaldehyde, 390
pH measurement for the fibers industries, 168
quantitative chemical analysis (German book), 309
CHENILLE, see *Pile fabrics*.
CLEANING, see *Cleaning of machinery, Laundering, Washing*.
CLEANING MACHINERY, see *Opening machinery, Cleaning of machinery*.
CLEANING OF MACHINERY, P451 (see also specific machinery)
devices for collecting fibrous deposits, P220
dust extraction for rag, flock, and jute pulling, 236

CLEANING OF MACHINERY (*continued*)
Parks-Cramer overhead cleaner, 94
pneumatic cleaner, P119
traveling fan for lint and dust cleaning, P175
waste removal, P115
Whitin downstroke cleaner, 285
CLOTHING: impervious to x-rays and beta-rays, P458
scientific aspects of the design of a full skirt, 430
testing program with 36 pleated skirts, 481
wear tests of warp knitted viscose rayon garments, 389
wear tests on overalls, tricot underwear and socks, 534
wear tests on shirts, 534
COATING (see also *Flocking, Teflon*)
composition containing water soluble fluorescent dye, P276
electrostatic coating apparatus, P353
fabrics, P84, P180, P318
laminated leather-like surface film, P227
nylon, P125, P180
one side with *d*-isocyanate-modified polyesters, P126
polyvinyl butyral coated, properties, 375
pyroxylin and vinyl coated, 294
web coating apparatus, P276
fibers
chemical, 65
gas agitation process, P180
glass, 188
filaments, P545
production, P401
slasher cans, etc.
silicone resins for anti-sticking, 97
Teflon, 71
threads, P459
COILING, see *Sliver*
COIR FIBER: economical production, 90
COLOR (see also *Color matching, Colorfastness, Dyeing*)
designers approach, 480
in dyeing, 488
effects of chemical constitution in simple anthraquinone compounds, 499
mesomerism, review, 34
statistical aspects of color control, 536
COLOR MATCHING, 64
matching du Pont dyes to U. S. Army color card, 300
type of light, 535
COLORFASTNESS: acid dyes on wool, 300
drapery and upholstery fabrics, 60
ratings for developed dyes on cotton, 535
specification and labelling, 536
vat dyed cottons, 57, 58
COMBING (see also *Carding, Hackling*)
cotton process, 417
effect of lap preparation on waste extraction, 417
Platt technique, 417
Saco-Lowell combing cycle, 417
COMBING MACHINERY, P271
combing journal box waste, P174
detaching roll weighting mechanism, P541
machinery guard, P349
Saco-Lowell comber improvement, 417
Saco-Lowell model 54 comber, 141
sliver feed mechanism, P174
top roll clearer, P115
Whitin model J 8-head high speed comber, 141
wool tops, P174
CONDENSING, see *Sliver.*
CONES, see *Winding machinery.*
CONFERENCES, EXHIBITIONS, etc.
Atlantic City Show, 174, 348
Basle Fair, 502
Cotton Chemical Finishing Conference 1953 (papers), 270
Cotton Research Clinic, 76, 347
Hanover Fair, 348, 396
CONFERENCES, EXHIBITIONS, etc. (*continued*)
history of textile fairs in Frankfort, Germany, 347
Swiss Industries Fair, 396
CONSUMER ATTITUDES
analysis of consumer complaints, 174
in the field of dyeing, printing and finishing, 396
new fabric needs for better clothing, 396
CONVERTERS, see *Tow to top.*
CORDAGE (see also *Rope, Tire cord*)
analysis of factors determining strength, 519, 520
extension measurements on industrial textiles, 444
hard laid cord for fishing lines, etc., P398
machinery, P37
making cord from twisted web, P37
CORDUROY, see *Pile fabrics.*
CORONIZING: glass fabrics, 21, 45, 205
COSTS: basic mill costing method, 496
break-even graph, 267
cloth costing calculations, 446
effect of raw wool cost changes on finished goods prices, 347
method for making estimates quickly, 497
woolen mill labor cost control, 538
COTTON (see also *Cellulose, Luster, Microbiological degradation, Moisture relations,* and under specific processes)
basis of cotton textile development in Texas, 502
color, 513
consumed in final uses, 409
degradation by heat and moisture, 185
irrigated: processing and properties, 1, 240
military textiles, 331
new crop: processing, 520
overdrying, 465
processing
apparatus for storing fiber in bulk and removing in detached loose masses, P217
effects of mill processing, 138
European processing methods, 321
fine-fibered, 290
selecting, blending, and cleaning in Europe, 321
technology and manufacture practices in the Orient, 321
quality, 137
European requirements and procurement practices, 322
methods of evaluation, 533
varieties, 2
Acala, 41
Indian, 186, 410
Indo-American long staple type, 170, 186
relation to luster, 41
Russian, 185
Texas Deltapine 1954, 513
varieties planted, 1950-1954, 409
COTTON, CHEMICALLY MODIFIED
acetylated, 499; partial, 89, 434, 500
aminized: chemical and physical properties, 281
chemical reactivity, 361
methods, 281, 465
cyanoethylated, 4, 410
phosphorylated, 214
reaction with beta-propiolactone, 449
review of treatments, 513
COTTON FABRICS: Hycar-sized denim, 376
partially acetylated: resistance to nitrogen dioxide and to hydrogen chloride, 500
study of sealing of close cotton cloths when wetted, 166, 263
weathering: study of fabrics containing chromic oxide and copper in inorganic and organic form, 484
COTTON FIBERS: concentric cellulose layers in cell wall, 410

COTTON FIBERS (*continued*)
crystallinity, 186; influence of heavy beating, 233, 321
degree of polymerization: influence of heavy beating, 233, 321
dielectric constant and dissipation factor: measurement, 466
effect of mechanical blending on properties, 492
effect of weathering prior to harvest, 409
European research on fiber properties and laboratory test methods, 322
geometrical features of three Indian maturity groups in raw and swollen states, 465
maturity, 2
optical and electron microscope studies, 137
orientation, 1
phosphorus content of Egyptian raw cotton, 466
physico-chemical properties, 513
relation between Micronaire fineness and Causticaire maturity, 67
strength of attachment to seed, 186, 514
testing: fiber and spinning tests, 2, 409
fineness: Causticaire, 22
maturity, 2
Micronaire testing in prevailing atmospheric conditions, 441
mill laboratory tests for selection and purchase, 206
speeding up Micronaire fineness tests, 441
strength, 2; at finite gauge lengths, 335
triboelectric response: measurement, 501
COTTON GINNING: comparative tests on Indian cottons, 514
fiber attachment to seed, 186, 514
laboratory gin, 514
machine-stripped cottons, 2
machinery, P315
overdrying, 465
COTTON MARKETING, 2; USDA market news service, 185
COTTON YARN: effect of cotton fiber strength on properties and processing behavior of single yarns, 368
formula for predicting strength of plied cotton yarns, 262
knop-like nodules in cotton and staple yarn which pull out to thin places, 147
relation between yarn number, twist and contraction of combed cotton yarns, 193
structure and properties of cotton and synthetic singles yarn, 369
COURLENE, 139, 515
CREASE-RESIST FINISHING, see *Creaseproofing*.
CREASEPROOFING: cellulose hydrate fibers, 299
Cet, cycloaliphatic compound, 526
cotton, 155, 250, 299
cotton and viscose: aminoplastic condensation products, P509
linen, 155, 250, 299
method for identifying aminoplasts in creaseproofed fabrics, 210
processes, 155
rayon staple fabrics, 251
review, 17
urea-complex-formaldehyde, P509
woven fabrics, 379
CREELS AND CREELING: adjustable skein holders, P454
creeling truck for beam creeling, 196
indicators of defective threads, P399
spinning machines, P350
warping, P455
yarn brake, P120
yarn supply, P37
CRIMPING: acetate yarn in boiling water, 432
acrylonitrile polymer fibers, P503
crinkling of fibers, P508
machinery, P541
CRIMPING (*continued*)
mechanical variations in the viscose spinning process, 324
method for fibers, P217
nylon yarns, P545
processes for wool-like rayon yarns, 290
rayon staple, 6
synthetic fiber yarns, P349
treatment for yarns, P402
CUPRAMMONIUM RAYON: structure and hydrophilic properties, 139
CUTTING MACHINERY (see also under specific processes)
cloth cutter, P83
cutting filaments, threads, slivers, etc., P454, P541
device for cutting a web, P545
thread cutting mechanisms, P508
CYANOETHYLATED COTTON, see *Cotton, Chemically modified.*
DACRON: heat insulating Dacron filler, P349
DECATING: decating tests, P548
velours, 379
wet, 64, 378
DECORTICATION (see also *Degumming*)
apparatus, P503
coir, 90
machinery, P35; cotton stalks and pulp, P35
ramie, 90, 322; machinery, P173
sisal: German machines, 361
DEFECTS, see *Consumer attitudes, Fabric defects, Neps, Tar spots, Uniformity,* and under specific subjects.
DEGRADATION, see *Photochemical degradation, Microbiological degradation,* and under specific subjects.
DEGUMMING, P503; microbial, 515
DELUSTERING, 58
DESIGN OF EXPERIMENTS, see *Statistics.*
DESIZING, 12 (see also *Sizing*)
continuous open width, 377
enzyme, 17, 295, 377
glass fabric webs, P39, P180
manufacture of desizing agents, P275
procedure using superheated steam, 378
DETERGENCY, see *Detergents.*
DETERGENTS (see also *Laundering, Scouring, Soiling, Washing*)
anionic: rapid test for quantitative determination, 495
bibliography of analysis, 112
classification of detergents, six organic qualitative tests, 311
comparison of artificially soiled cloths in ability to evaluate cleaning, 495
Duponol RA, 527
evaluation of stability to hard water, 308
finishing and laundering, 387
index of sulfonated oils and modern detergents, 448
laboratory apparatus for detergency studies, 448
methods for evaluation of detergent action, 308
nonionic surfactants, 449
papers on (book) 112
processing, 378
relation of structure to detergency of some alkylbenzene sulfonates, 268
relative efficiencies of detergents for removing soil, 495
requirements for textile operations, 500
review of literature on fats, oils and soaps, 1953, 214, 268
scouring, 251
synthetic: in processing, 205
synthetic: symposium, 450
theory of micelle structure, 215
whiteness retention additives in detergent action, 539
DIRECT SPINNING, see *Tow to top.*
DIRECTORIES: glossary of finishes, 21
man-made fiber producers, 283, 469

DIRECTORIES (*continued*)
trade names of textile finishes, 491
DIRT, see *Soiling*.
DOBBIES, P223; for operation of heddle shafts, P456
for shuttleless automatic looms, P176
stresses on treadle dobbies, 292
DOFFING: doff load tables for spindles, 420
mechanisms for spinning, P79, P221
DRAFTING, see *Drawing*.
DRAWING (see also *Roving, Sliver, Spinning, Uniformity*)
back draft and subsequent untwisting during drafting, 418
high draft: for cotton, 93
development, 473
studies on apron drafting, 473
history, 325
modified, 288
multiple: effect on 1.5 denier 1½ inch staple nylon, 191
new process of drawing the card sliver in three successive drawing phases, 418
Perlon staple: feed roller adjustment, 142
simultaneous twisting and drawing of fibers, 287
theory, 93; drafting force, 142, 239
fiber blending in worsted drawing, 473
fiber motion in the roller draft field, 419
sliver: equation of drafting, 474
study of fiber movement using radioactive fibers, 191
study of relationship between amount of waste and degree of draft, 287
uneven mixing in doubling, 50
wool, 142
woolen mule, 191
DRAWING MACHINERY, 48, P116, P175, P397, P503, P541 (see also *Drawing rolls, Roving machinery, Sliver, Spinning machinery, Tow to top*)
adjustable long tape cage on two tape drawing system, 238
apparatus for conducting fibers through a roller nip, P218
cleaning drawing mechanisms, P116, P451, P504
double belt drafting mechanisms, P451
drafting devices or heads for long staple fibers, P350
drafting zone with ratch less than minimum staple fiber length, 271
drawframe with 6 into 2 arrangement eliminating roving frames, 518
drawing frame studies, 9
endless belt drawing system, P219, P452
fiber condensing means, P350
German single basic unit speed frames, 366
German specifications for draw-frames and speed-frames, 518
German tape drawing system for spinning waste yarns, 366
high draft, P350, P452
Ambler high draft, P116, P218, 518
Casablancas high draft, P116
cradle for top aprons, P219
duo-Roth Saco-Lowell models SDR-1, 2, and 3, 48, 143
German two-zone speed frames, 239, 366
OM-S super high draft spinning frame (Japanese), 143
roller type, P78
Saco-Lowell Shaw model SS-2, 143
vertical apron drafter, P504
Ideal drawing frame, 93
pneumatic device for returning outside sliver to weighing apparatus, 93
Raper autoleveller, 325
Saco-Lowell model DS-4 drawing frame, 143
DRAWING MACHINERY (*continued*)
Saco-Lowell Z-6 drafting system, 144
stop motions, P219, P504
weight hook for drafting head, P219
Whitin even-draft drawing frame, 144
Whitin Rolo-drafter (square cut staple), 144
Whitin Roto-drafter (processing top), 144
DRAWING ROLLS: clearers, P116
covers, P116
effect of type and adjustment of rollers on the drafting and gripping forces, 418
getting the most life from your cots, 287
influence of roller eccentricity on yarn regularity, 325
saddle weighting device for 4-line roller system, P219
saddle weighting system, P78
supporting and loading means, P398
tension mounting for lower apron, P116
top rolls, P174, P219, 366, P452
device for supporting and weighting, P174
grinding and measuring, 239
means for supporting and loading, P350
process for covering with tanned whale leather, P398
saddle, P504
tests with various constructions and polishing with pendulum grinding machine, 191
weighting device, P78
weighting saddle in apron drafting, P78
weighting, P350, P398, 419, P452
DRIVES (see also under specific machinery)
calculations concerning driving efficiencies, 338
electric, P118, 265
machine drive problems, 111
machine drive requirements, 446
mechanism, P221, P505
variable speed drives, 72
DRYING (see also *Slashing*)
discontinuous, P547
processes, 257
resin curing, 334
screen printing: absorption method, 531
squeezing apparatus, P401
squeezing effect, 297, 378
superheated steam, 160, 439
DRYING MACHINERY, P127, P512, P547, (see also *Slashing machinery*)
automatic continuous fabric, 257
blower installations, P512
control of humidity, P512
cut staple, P217
cylinders, P128
fabric, P128, P512
German flat drying and tentering frame, 531
German hot air machines, 204
Haas short loop fabric drier, 439
hosiery, P40, P86, P128
infra-red, 303, P402
pressure: rapid cheese drying, 204
printed or coated webs, P128
reels, P127
sieve drum, P512
sized warp, P272
steam and current consumption, 205
stenter type, P512
superheated steam, 491, P511, P512
traveling support for hank driers, P40
turning station for loop driers, P547
Vapojet drying system, 103, 160
variation of drying rates, 386
yarns, P40, P180, 337
DYEING (see also *Color, Color matching, Colorfastness, Fugitive tinting, Gas fading, Lightfastness, Perspiration fastness, Ultrasonics, Waste treatment*)
du Pont Technical Bulletin fiber index, 528

DYEING (*continued*)
history, 18, 59, 202, 531
19th century, 383
practice of dyeing (book), 437
Redox control and measurement, 20
research, 62
review, 18
review of 1953, 102
stripping, 438
use of simple empirical formula for calculation of apparent strengths (depths), 490
acetate rayon: aftertreatment with salicylic acid, P511
agents, 296
disperse dyes, 61
dope-dyed, 139
process; acid fading inhibitor, P510
purpurogallin, 300
tricot, P85
vat, P228, P460
Acrilan, 438
acrylic fibers, 19, 203, P355, 435
acrylonitrile copolymers; dyeability, 470
dyeing problems, 252
mechanism of dyeing with anionic dyes, 313
piece dyeing, 488
vat dyeing acrylonitrile materials, P356
blends, P355; cellulose/synthetic fibers, 61
Dacron/nylon/acetate, 333
Dacron/rayon, 301
Dynel/rayon, 102
Dynel/rayon/acetate, 102
rayon, 438, 485, 528
wool for carpets, 61
wool/cellulose, pad steam process with Anthrasol dyes, 202
wool/Dacron: Dowicide A as carrier, 300
navy shades, 529
wool/staple fiber, black, 158
wool/synthetics blends, 61, 486, 491, 528
yarns and fabrics with two- and three-fiber blends, 485
cellulose: aniline black, 254
Anthrasol dyes on yarns, 300
direct dyes, 32, 61, 214, 302
esters, P85
partially acetylated, 530
review, 203
cotton, 377
classification of du Pont direct and developed dyes, 202
cyanoethylated, 485
high temperature sulfur, 436
indigo, 333
metal complex compounds, 333
preparation of fabrics for, 377
cuprammonium rayon: fine denier non-twisted, 203
Dacron, 435, 438; absorption of disperse dyes, 486
Merpol B as dyebath assistant, 381
naphthol, 63
Dynel, 438, 528
glass fibers, 188
man-made fibers, 157, 159, 487, 529
acetate dyes by pad method, 107
problems, 383
nylon: large vat dye particles, 382
neutral-dyeing metalized dyestuffs, 107
package form, 18
pigments, 528
tricot: acid and direct dyes, 202
vat, P547
vat: pad-steam continuous process, 386
yarns, P126
Orlon, 333, 435, 438; copper treatments, 19
vat, 530
Perlon, 64
plastics: organic coloring matters, 204
polyamide fibers: coefficient of diffusion, 301
dispersion dyes, 254
polyamide or polyurethane products, P402
polyester fibers, P355; filaments, yarns and fabrics, P227
linear polyester fibers, fabrics, etc., P355, P402
polyethylene terephthalate fibers, P85
polyvinylchloride fibers, 157, 435
rayon: Fibro fabrics, 485
filament yarns by disperse dyes, 204
soaping of dyed and printed goods, 384
vat dyes on spun rayon, 333
silk: calcium soap deposit after dyeing, 297
direct, Anthrasol, 61
effect of heat treatment on dyeing properties, 62
Terylene, 435, 438
Vinylon: direct dyes; rate of dyeing, 385
dye accessibility, 437
purpurogallin, 300
viscose rayon: Abbott-Cox process, 303
vat, 385
X-51, 438
wool: acid; neutralization as means of improving hand, 303
acid vat, P318
adsorption of detergent, 201
alteration of mechanical properties, 18
chrome, 106, 332
controlling Cibalan dyebath pH, 64
continuous; Standfast molten metal technique, 302
diffusion dyeing rate, 19
direct Anthrasol, 61
effect of dyeing method on wool wear, 156, 437
effect of heat treatment on dyeing properties, 62
effect on water sorptive capacity, 62
gabardine cloths, 435, 436
high temperature, 159
Irgalan hot-dyeing process, 487
level dyeing properties of dyes, measurement, 302
leveling agents, 302, 303
neutral-dyeing metalized dyestuffs, 107
rate of diffusion studies, 19
stripping, P401
use of hydrogen peroxide, 155
water soluble naphthols, 107
weakly ionized acid dyes, 529

DYEING MACHINERY AND EQUIPMENT, P127
apparatus for delivery to dyebath of correct proportions of ingredients, P227
Barotor, 103; loading improvement, 527
closed high temperature machine, 157
color concentrate distributing and mixing means, P180
design dyeing apparatus, P511
glass hoods on dye vessels, 333
for hanks of yarn, P547
high pressure hot water heating system, 302
Indigosol continuous dyer, 158
laboratory package dyer, 332
laboratory skein-dyeing machine, 254
molten metal, P85, P546, P547
Niptrol pneumatic mangle, 488
pad mangles, 383
perforated conical dye tube for winding yarns, P180
Steverlynck system, P179
for synthetic blends, 102
winch dyeing machine coated with Kera synthetic resin, 256, 383

DYEING METHODS, P127
fabrics: Acramin-F process, 255
continuous: Indigosols, 253
pad steam process, 18

DYEING METHODS (*continued*)
Standfast molten metal process, 18, P85
electronic control, 158
embossed fabric, P40
garments, including button dyeing, 255
knitted, 482
padding and continuous methods with Coprantine dyes, 202
pressure, 107; Steverlynck static pressure, 158
winch: azoic dyes on knitted cotton, 60
fibers: spun dyed fibers and yarns, 489
yarns: beam-dyed, 332, 528
package: addition of anthroflavic acids to vat dyes, P510
cheese, 254, 528
synthetic fibers, 303
synthetic filament yarns, 385
vat dyeing, 439
pre-dyed stretch yarns, 437
stretch yarns without loss of elasticity or curliness, P318
DYEING THEORY: adsorption of dyes by crystals, 313
colorimetric studies of the reaction of naphthalene orange G with amino acids, 313
direct dyeing of cellulose, 32
dyeing of synthetic polypeptides, 313
mechanism of absorption of non-ionic dyes by polyethylene terephthalate, 314
review, 159
solubility and activity of orange II sodium chloride and sodium sulfate solutions, 314
stereochemical problems in dyeing, 313
study of dye affinity for synthetic fibers as related to dye constitution, 384
study of dyeing, using the unimolecular film balance, 314
DYES
acid: aggregation tendencies of acid wool dyes in saline solutions, 252
treatment with ultrasonics, 256
afterchrome, 60, 488
Cibalan: behavior towards wet decating, 64
potting fastness, 64
copper agents, advantages, 63
copper dyes, direct, review, 157
developing process, P354, P547
developments during 1954, 491
disperse dyes, 107
dispersible dyestuff powders, P227
dispersible vat dye powder, P402
fluorescent, 253
Insonite dye fixing agent, 381
metal complex, without sulfonic acid groups, 303
metalizable polyazo dyes, manufacture, P355
nitrogenous materials metalized azo dyes, P180
premetalized, 63
naphthol, 19; crocking fastness, 383
fabric after-treatment changes, 106
natural dyewoods, 63
Brazilwood and logwood coloring matters, 489, 490
phthalocyanines, P355, P356
pigment: piece-dyeing, 435
with indanthrene dyes, 159
polyvinyl pyrrolidone for stripping, etc., 31
powder treatment to allay dust, P127
resists under Indigosols, 489
testing
chromatographic method: acid dyes, 307
colorimetry in determining dye formulations, 257
differential refractometer, 110
near infra-red reflection, 309
thiazine series, P354
vat, P127; aftertreatment changes in fabrics, 106
DYES (*continued*)
anthraquinone: chemistry of, 62
Cibanone Brown BR, manufacture, 252
chemistry, 530
control of processes, 381
development through to plant, 157
high temperature, 381
using trialkanolamines and manganese compounds, P355
impregnation with vat dispersions, P511
knit goods, 529
reduction-oxidation potential, 301, 489
research, 64
shade changes on soaping: theory, 159
soaping aftertreatment, 17
stabilization of leucos at high temperature with cobalt compounds, P511
study of sodium sulfoxyate-formaldehyde as a primary reducing agent, 487
viscosity stabilization, P40
water soluble: development work, 299
EDUCATION
British industry contributions to textile education, 270
college level textile education, 348
ELECTRICAL EQUIPMENT: improved fuses for electric motors, 338
mill electrical equipment, 338
ELECTROSTATIC PHENOMENA, see *Flocking, Static electricity.*
EVENNESS OF YARNS, see *Uniformity.*
EXHIBITIONS, see *Conferences, exhibitions, etc.*
FABRIC CONSTRUCTION, see *Fabric design.*
FABRIC DEFECTS
acetate fabrics: weathering, 479
curly or wavy selvages: twill-weave fabrics, 101
Dacron: pilling control, 531
filament fabrics: shadow or pattern streaks, 327
oil stains: sources and prevention, 479
oil stains on wool: methods of removal, 479
origin, 66
rayon: case histories of streaks, 524
whitish patches from abrasion in wet treatment, 67
reed marks, 205
velveteen and Genoa back corduroy, 431, 524
viewpoint of garment maker, 198
viscose rayon fabrics: streaks or stripes, 306
viscose tulle curtain: microbiological fiber damage, 433
warp and weft stripes and streaks, 56, 376
weaving, 98; causes, 292
eliminating setmarks, P506
FABRIC DESIGN: apertured, P124
backed cloth settings, 331
Bedford cords, 248
broken twill effects, 293
color space-dyed yarns, 18
complex double cloths, 431
contoured decorative surfaces, P401
crepe weaves, P83, 480
moss, 248
superimposed weaves, 525
cross-dyed rayon crash, 431
decorative effects on plain woven cloth, 480
diaper effects, 16
double cloths, 247, 331, 376
drafted diagonals, 247
drafting styles, 152
endless woven tubular, P125
extra warp figuring, 480, 525
fancy coating tweeds, 247
leno weave elastic, P226
line stripe in twills, 57
mule-spun worsted yarns, 57
multi-ply tubular woven fabric, P317

FABRIC DESIGN (*continued*)
novelty coating tweeds, 57
novelty yarns, 525
ornamentation by partial dissolving of soluble threads, 376
pepper and salt fabrics, 154
removable carrier threads: open work fabrics, 56, 153, 248, 295
Saxony and Cheviot tweeds, 295
Saxony suiting tweeds, 16
shaded effects, 57
spot effects, 102
star effects, 16
textile design and color (book), 431
tricot-weave for overcoatings, 525
tweeds, 16
twill weave settings, 16
two color cloth with double warp, 521
vapor permeable fluid repellent, P126
warp backed fabrics, 102
weave changes by thread removal, 481, 525
weave structures as design motifs, 295
weft-backed weave settings, 152
FABRIC HANDLING EQUIPMENT (see also *Metal detectors, Tension devices,* and under specific processes)
Bates cloth measure marking machine, 377
cloth guide, P402, P459
cloth measuring and inspecting machine with selective speed control, P548
continuous measurement of width of running fabrics, 494
conveying web-like material, P512
feeding cord fabric to or from treatment, P128
joining lengths of cloth, P226
knitted fabrics, P401
marker device, P274
spreading tubular fabric, P274
straightening apparatus, P40
stretching and guiding tubular fabric, P128
treatment with powder or granular material, P128
web edge position detector, P459
FABRIC PROCESSING, see *Finishing* and specific processes.
FABRIC PRODUCTS, (see also *Carpets, Clothing, Parachutes, Rubber products*)
bag construction, P545
belting, P507
blankets (Dacron) effect of twist on nap, 198
conveyor belt with conveyor surface of cured latex, P178
filters, P124, P226
data on resistance to fluid flow, 269
filters for fluids, P352
Mahhya Bharat saris, 294
sheets: fitted nylon, 198
trimming cloths, 57
FABRIC TESTING (see also *Abrasion, Friction, Uniformity* and specific fibers and processes)
bubble pressure test for measuring pore size of fabrics, 165, 263
camera lucida for evaluation of fabric construction, 210
cloth profile recorder, 442
density: method of determining, 389
effect of yarn properties on structure and properties of fabrics, 241
flexural rigidity determination of fabrics: vibrating reed method and Clark paper-softness tester, 305
hand: Handle-O-Meter, 166
serviceability, 307
surface study using replication, metallic evaporation, and photomicrography, 110
surface characteristics of fabrics: device, 443
tear resistance, 167
techniques of analysis, 26
FABRIC TESTING (*continued*)
thickness (apparatus), 305
thread slippage: device for measuring, 442
wear-resistance: apparatus and tests, 166, 306, 307
wire strain gauge type tester to measure load-deformation, 390
FABRICS, (see also *Abrasion, Blends, Fabric products, Felt, Friction, Knit fabrics, Luster, Narrow fabrics, Nonwoven fabrics, Pile fabrics, Selvages,* and under specific fibers and processes)
drape, 7
effect of texture on physical properties and of processing on texture, 376
effect of yarn properties on structure and fabric properties, 241
electrical resistance of textiles, 269
engineering design of fabric structures, 429
factors affecting tear resistance and water resistance of lightweight clothing and tentage fabrics, 56
fusible: forming a reinforced edge on, P459
mechanical requirements of stiff cloths for crinolines and similar heavy fabric structures, 430
relation of certain geometric factors to the tear strength of woven fabrics, 479
resistance to fluid flow, 269
serviceability study, 306
structure and weft density, 247
systematic classification, 375
FADING, see *Gas fading, Lightfastness, Washfastness.*
FASTNESS (see also *Colorfastness, Lightfastness, Perspiration fastness, Washfastness*)
tests and standards for fastness to light, washing, water, etc., 444
FELT: instruments of use in feltmaking operations, 168
papermakers' felts, P226, 294
production from mixture of animal fibers and cellulose acetate, P545
FELTING, see *Fulling, Shrinkage.*
FIBER IDENTIFICATION, see *Fiber testing.*
FIBER TESTING, (see also *Abrasion, Friction* and specific fibers)
apparatus for stress-relaxation tests for cellulose filaments, 165
flexural rigidity determination of filaments and yarns (vibrating reed method), 305
identification and analysis: scheme, 259, 492
length: brush method, 441
semi-automatic measuring machine, 258
single-measurement method, 22
relaxation: measuring apparatus, 67
Shirley combined stapling test, 163
strain gauge for precise force measurement, 259
strength: Clemson flat bundle tester, 68
strength and elongation: testing apparatus, 387
stress recovery: measurement, 414
stress relaxation: measurement, 532
stress-strain: apparatus, 22
structure: x-ray diagrams, 71
tensile recovery: animal fibers, 206
tester for determining fiber length, length uniformity and degrees of surface friction, P318
tester: AEG-Frank no. 678 for single fibers, 337
wire strain gauge type tester to measure load deformation, 390
FIBERS, (see also *Acrylic fibers, Alginate fibers, Bast fibers, Blends, Casein fibers, Cellulose, Friction, Hair fibers, Man-made fibers, Moisture relations, Protein fibers, Twist,* and under specific fibers and processes)
annual review 1954, 471
compliance ratio, 7
cross linking bridge formation, 3
data on end uses, 396
drying twist of plant fibers, 1

FIBERS (*continued*)
effect of temperature on, 189
electrical resistance and effect of humidity and heat, 269
electrokinetic effects of streaming and electroosmosis, 46
electrokinetic potentials in solutions of normal electrolytes and surface active compounds, 344
fiber science (book), 45
fibrous plants, 467
future of the natural fibers, 411
Matthews textile fibers (book), 92
mechanical behavior, 31
mechanical conditioning 46
modification of physical properties of hard fibers through chemical treatment, 186
refractive indexes, 259
relation between micro-structure and sorption phenomena, 235, 284
stereomicroscopical examination, 388
structure (book), 45
structure and optical behavior, 471
swelling and de-swelling processes, 387
tensile properties: alteration by mechanical conditioning, 285
torsional rigidity, 235, 414
FILAMENT YARNS, see *Yarns.*
FILAMENTS, see *Fibers.*
FINISHES, (see also under specific processes).
aqueous, containing methylol higher fatty acid monoamides, P179
aqueous, containing methylene higher fatty acid diamides, P179
chemical requirements for acetate rayon, 296
compositions, P40
glossary of finishes, 21
influence on fiber friction, 440
list of trade names, 491
pigment binding power of textile finishing materials, 482
polyvinyl and polyacrylic: identification reactions, 309, 445
quaternary ammonium compounds, P275, 527
review of chemicals and auxiliaries, 108
standard methods for removal from textiles, 496
stiffening agents, 16
FINISHING (see also *Cotton, Chemically modified; Instrumentation, Resin finishing, Textile chemicals, Waste treatment, Yarn processing,* and specific finishing processes)
acrylic textiles, 488, P509
action of carroting agents, 485
automatic control, 386, 440
bengaline, 334
blends: dry finishing, 334
Dynel/rayon, 102, 334
Dynel/rayon/acetate, 102
synthetic, 102
wet processing machinery, 17
yarns and fabrics, 387
cellulose fabrics, P126
cellulose textiles reacted with aldehydes in azeotropic medium, P275
chemical finishing techniques, 248, 298
cotton, 435, 482
Cotton Chemical Finishing Conference 1953 (papers), 270
linen-like finish, P227
cotton duck: additive finish for sunlight resistance, 59
finished fabric surface study, 110
finishing and sizing, P227
glass fabric: resin impregnation, P39
glass fabrics, 482
historical notes, 201, 485
FINISHING (*continued*)
hosiery, 65; lanolized finish for nylon, 380
nylon or Perlon stockings, 161
quality control, 29
imparting luster and firmness to fabrics, P546
instrumentation:
electrical moisture content control apparatus, P228
general survey of needs, 28
knit fabrics, 428, 482
shearing or cropping of tubular knit fabrics, P128
tubular knit fabric, P356, P401
uncurling knitted fabrics, P276
man-made fibers: wet processing review of 1953, 103, 156
man-made fibers and blends: general review, 161
metal and other stains, 161
nylon: stiff finish, P545
overfeed for accurate reproduction of fabric dimensions, 161
Perlon: finishing, 525
permanent, P353
polyvinyl chloride fibers, 157
producing textile cellulose sulfoethyl ether cation-exchange material, P318
review, 66, 205
review of literature 1950-1953 (book), 531
review of 1953, 102
ribbons, 298
to rid fabrics of reed marks, 205
scent improvement of textiles, 434
softening, 102
textiles with improved heat resistance, P510
treating thermoplastic web, P276
treatment of bias fabrics at a constant angle, 304
weight losses and their causes, 257
wet processing of fabrics, P460
wool: use of hydrogen peroxide, 155
FINISHING MACHINERY, (see also *Applicators, Fabric handling equipment, Yarn processing* and specific finishing processes)
Adams oscillating unit for scouring, fulling, washing, and wet or dry napping, 249
Bond machine for wet processing, 154
continuous treatment apparatus, P226, P401
hot water storage heaters, 258
modernized finishing plant, 334
Niptrol pneumatic mangle, 433
ribbon finishing machinery, P276
safety batching device, P276
wet treating fabrics, P353
wet treatment of textiles in rope form, P353
FIREPROOFING, see *Flameproofing.*
FIXING, see *Setting.*
FLAMEPROOFING: aminoethylated cellulose derivatives, P39
aqueous suspensions of halomethylated phosphates, P510
with brominated alkene phosphate compounds, P354
chemical flameproofing agents, 434
class test guide, 443
coating composition, P546
composition, P84, P275
compositions containing phosphate and halomethyl groups, P460
Flammable Fabrics Act, 444
organic phosphorus compounds, P510
with phosphorus oxychloride and ammonia reaction agents, P354
processes, P84, 379
with polyphosphonitrilic ester, P276
review of fireproof finishes and processes, 105, 296
review of methods and testing, 483
solution for cellulosic materials, P510
testing stability of finishes, 105

FLAMEPROOFING (*continued*)
with THPC resins, 251, 299
FLAX (see also *Retting*)
FLOCKING (see also *Printing*)
AWR traveling flock-printing carriage, 491
machinery, P178, P274
machinery: electrostatic, 101, 152, 387
pile fabrics
cellulose acetate fibers on adhesive-coated surface of web, P275
electrostatic production, P459
FLUORESCENCE
fluorescence of solutions (book), 393
testing and identification, 27
FRICTION
fabrics: testing device, 443
fiber: in carding, drawing, spinning, 147
fiber round a cylinder, 501
instrument for measuring, 493
literature survey, 363
measurements of the influence of finishing agents, 440
tester for determining degrees of surface friction, P318
wool, 42
laws of static friction, 344
spinning: effect of cap-edge friction on yarn tension and balloon size and shape, 192
magnitude of friction between traveler and ring, 239
yarn: apparatus for measuring coefficient of friction, 533
measurement of air-drag, 164, 192
slippage in fabrics, 442
FUGITIVE TINTING, P355, 438, 486; nylon, P511
FULLING, 59; milled fabrics, P458
testing fastness of dyed and printed fabric, 534
theory, 59
FUNGI AND FUNGICIDES, see *Microbiological degradation.*
GARNETTING MACHINERY, P315, P541
stripping device, P315
GAS FADING: colored textile materials, P402
fast acetate rayon dyes, 436
rapid test for resistance of dyed cellulose acetate fabrics, 444
GINNING, see *Cotton ginning.*
GLASS FABRICS, 45, P353 P508 (see also *Coronizing, Finishing,* and specific processes)
industrial applications, 294
for insulation, 375
method of filling open mesh glass cloth with colloidal asbestos fibers, P317
GLASS FIBERS: chemical characteristics, 188
fiber data sheets, 516
method and apparatus for processing, P349
strength, 11
surface area determination, 23
GLASS YARNS: glass fiber twine, P118
impregnated, 11
measuring the tensile strength of glass filaments, P129
properties of glass yarns prepared with various emulsions, 241
GRILON: processing, 424
properties and development, 363
HACKLING: hemp, 41
HAIR FIBERS: interaction with alkali bromide solutions, 539
interaction with various aqueous solutions, including dye baths: radioactive tracer techniques, 495
human: direct measurement of softening at various relative humidities, 440
measuring swelling in aqueous solutions, 414
relaxation of stretched human hair, 323
HAIR FIBERS (*continued*)
rabbit: structure and properties, 43
HARNESSES, P352 (see also *Heddles*)
actuating mechanism, P456
frame connector, P176
harness heddle frame, P81
servicing cam harness motions, 28
shaft motion, 13
strap, P38
HEAT SETTING, see *Setting.*
HEDDLES, P81, P506 (see also *Harnesses*)
for fine fabrics, 150
guiding push rods for control of, P506
heddle frame, P176, P543
mechanism for actuating, P456
repair head for, P507
return movement device, P273
HEMP (see also *Hackling, Retting*)
hemp industry in Italy, 282
histological structure, 467
HOSIERY (see also under specific processes)
English foot style, 101
French foot, 151, 247
full-fashioned, 14, 330
fitting, 56
length measuring device, P130
mill practice in knitting 400-needle nylons, 329
nylon socks: different constructions and blends, 248
plasticizing machine for nylons, 439
processing, P228
stockings: silk, cotton, rayon, nylon (book), 429
top for a seamless stocking, P177
variations on round heel theme, 478
volumetric leg form for measuring and recording stretch, 265
wear tests with stockings, 445
woolen and worsted: spun yarn in, 289
HOSIERY MACHINERY, P178, P544
apparatus for applying markings, P547
automatic devices, 427
Banner Intarsia machine, 374
colored patterns on Komet links-and-links machines, 329
German Kalio machine for fine gauge nylon hose, 246
nylon hosiery, 429
sewing toe loops of circular knit hose, P82
stocking counting device, P274
welt bar, P178
yarn carrier, P458
HUMIDITY (see also *Moisture relations*)
continuous filaments for use in hygrometers, 188
measurement with psychrometers, 264
IDENTIFICATION, see specific subject as *Fiber testing.*
INSTRUMENTATION (see also under specific processes)
automatic controllers, 338
boiler house, 110, 265
chemical instrumentation in the pulp and paper industry, 167
electrical displacement measuring devices, P548
for fibers industries, 167
flowmeters, 167
instruments devised by Wool Industries Research Association, 169
JUTE (see also *Retting, Mercerization*)
action of alkalis, 467
action of light, 467
bacterial growth, 540
cuprammonium-proofed jute fabric, 104
degradation by light, 467
fatty content, 514
filament length in relation to processing, 322
lignin determination, 67
mechanical characters, 467
nature of the hemicelluloses, 410

JUTE (*continued*)
predicting spinning qualities, 411
rigidity, 411
KNIT FABRICS (see also specific processes)
color and design, 478
eyelet, 55
interlock: pattern effects, 245
knitwear inspection program, 30
method of making, P457
racked rib fabrics, 374
relationship of the geometry of plain knit cotton fabric to its dimensional change and elastic properties, 430
research on heat loss by wicking, 430
warp-knitted, P507
analysis from small samples, 109
dissection system, 263
KNITTING (see also *Hosiery*)
alignment charts, 55
circular method: independent cylinder and dial needles, P544
defects: causes and control, 245, 374
flat warp: processing different types and counts of yarn at the same time, 374
full-fashioned: outerwear, 14
sinker and divider loop pattern control, P544
sweater parts, 246
history and principles, 329
inspection program, 30
looper training method, 14
press-offs, 14
raschel: laying out specifications, 523
production control program in knitting plant, 374
Taslan, 428
tricot, 100
color marking warps, 12
weft: shaping, 151
yarn speed meter, 374
KNITTING MACHINERY, P82, P317, P507, P544 (see also *Hosiery machinery*)
automatic stitch length control mechanism, P457
carrier ring fastening device, P273
catchbar safety means, P317
circular, P507
flaw detector, P82
Intarsia, 428
interlock: automatic timing and control, 428
interlock: Mellor Bromley, 14
latch needle, 198, 246, 427, 428
movement timing and control, 478, 523
multifeed hosiery, P38
opposed needle cylinder type, P400
pattern means, P38
wrap stripe attachment, P83
yarn supplying and changing mechanism, P274, P507
cleaning with steam, 429
control method and system, P177
dial needle control for ribbed fabric, P400
double cylinder machines, 197
drive, P457; carrier rod driving mechanism, P507
eyelet, 55
for fabrics having plain and back stitches, P457
fitting and maintenance, 329
flat: Dofuma fully automatic double cam boxes, 246
full-fashioned, P124, P273, P544
goods figured on one side, P544
men's sweaters, 14
yarn guide, P507
guide to fixing Banner SCP-51 knitting machines, 478
lubrication, 246
machinery for modernization of combed knitting yarn mill, 537, 538
needles, P123, P457; dial transfer needle, P225
KNITTING MACHINERY (*continued*)
guard, P123
transfer needle, P38
raschel: Reiner and Kidde, 374, 429
rib, revolving and stationary rib hole-detector, P544
stop motion, P82, P83, P507
straight bar, P38, P83, P178, P274, P317, P457, P544
method and apparatus for cutting and clamping, P178
narrowing mechanism, P352
welt rod mechanism, P178
yarn package support, P225
take-up device, P225
tension: combined unit, P507
device, P178
measuring yarn, P82
transferring loops, P352, 373
tricot: pattern chains, 478
photoelectric stop motion device, 246, 247
warp, P38, P457, P507
F.N.F. new P.C. model, 55
German bearded needle, 427
guide construction, P274
Liba/Saupe rapid type LSZ 36, 56
tensioning bar, P39
thread-separating means, P458
yarn carrier and tube, P83
yarn control device, P124
yarn feeder, P39, P83
elastic yarn, P352
yarn treating apparatus, P543
KNOTS AND KNOTTING
knots and methods of forming, P454
knot tying device, P454
new knot for twisted products (i.e., rayon tire cord), P118
study of knot efficiencies of various yarns, 327
tightening loop formed during end-knotting in winding, P120
KURALON, see *Vinylon.*
LAPS AND LAPPING (see also *Picking, Sliver, Uniformity*)
device for removing knops from the ribbon lap, 286
lap forming apparatus, P115, P451
lapping of loose fibrous webs, P397
method and device for producing laps, P451
method of forming from card slivers on sliver lap machines, P452
LAUNDERING (see also *Detergents, Soiling, Washing*)
launderability test methods, 307
Launder-Ometer, 337
man-made fibers, 155
soiled linen, P546
Weltzien's folding-scraping tester, 307
LEVELNESS OF YARNS, see *Uniformity.*
LIGHTFASTNESS
breaking tests of dyed nylon yarns before and after exposure to light, 254
copper treatments in dyeing, 19
dyes: "Standard Reference Types", 390
Fade-Ometer, 496
influence of different classes of dyes on nylon, 62
Kelvin Hughes Fugitometer, 389
nylon dyed with large vat dye particles, 382
quantitative measurement of dye stability, 28
testing and measurement of colored fabrics, 169
LOOMS, P121 (see also *Bobbins, Dobbies, Harnesses, Picking (weaving) and picker sticks, Narrow fabrics, Pile fabrics, Selvages, Shedding, Shuttles, Temples, Tension devices, Weaving, Weft mechanisms, Winding machinery*)
actuating mechanism, P81
appearance and design, 522
attachments: converting to automatic, 13

LOOMS (*continued*)
automatic, for silk and rayon, 54
brake mechanisms, P223; warp beam, P400
calculations, 99, 150
cam (tappet) design, 55
checkstrap, P316
circular, P121, P122, P400, P455, 477
aplication of weft to warp, P351
beating-up device, P351
control devices, P120
delivery of warp threads to, P273, P543
device to check a weft thread for unwinding, P456
with gripper, 291
inserting filling yarns, P316
weft replenishing apparatus, P225
construction without crank shafts, 13
control mechanism, P352
cop loaders, P456
cop or pirn tubes for large amounts of weft, P222
cutting: float cutting method, P37, P400
thread cutter and gripper, P352
weft thread, P38, P121, P122
yarn, P38, P401
development in conventional loom construction, 244
doff safety bracket, P81
drive: cloth roller, P455
electrical and mechanical properties of the loom-driving motor, 371
heddle frames, P273
variation of driving torque and crankshaft speed, 371
electronic loom-timing indicator, 477
filling grate, P121
Georg Fischer looms, 373
German looms, 328
gripper shuttle looms, P81, P455
hand, P224
heavy, for flannel and industrial fabrics, 54
high capacity mechanical, P224
improvements, 426
inspection, 196
jacquards, P82; automatic card cutter, 522
calculations, 15
control mechanisms, P506
increased use in cotton industry, 372
mechanism, P176
mechanism for use without harness cords for cloth with small patterns, 99
needles, P543
lay, P121
aligning X-2 loom lays, 243
caps, P225
let-back means for fabric, P273
let-off motions, P81, P121
warp, P123, P400
web, P86
loom tuning, 98
maintenance program for Ruti automatic looms, 373
mechanism for actuating thread twisting means, P177
motions, 14
dynamical studies, 477
multiple weaving loom, P316
needle conversion on C & K multi-shuttle looms, 328
needle looms for interlacing machines, strippers or grid bars, P225
Northrop rapier loom, 427
problems in changeover to fully automatic, 372
reeds, P122
research and development at Shirley Institute, 150
rotating, P457
Saurer Swiss looms, 244
settings affecting fabric cover, 196
shuttleless, P123

LOOMS (*continued*)
air jet device for weaving, P80
Dewas French, 372
driving mechanism for weft inserters, P224, P456
filling control, P38
Swedish Maxbo loom, 291
spring dynamometer for determining power consumption per loom, 245
stop-rod supports, P225
stop motions, P81, 98, P122, P123, P352
filling, P224
photoelectric, P81
stopping and starting control, P455, P457
study of loom repairs, 373
Sulzer loom, 99, 197, 427
Swiss developments, 292
take-up motion, P123, P224, P274
three or more warp beams, P224
three-shuttle reshuttling motion model CFA, 427
tools for fixing, 328
two fabrics side by side, P122
warp stop motion, P80, 99, P225, P400, P544
electric, 244, P456
warp tension control, P177, P273
weaving machinery (book), 197
weighting motions, P224
warp beams, P457
yarn furnishing device, P38
LUBRICATION, see *Chemical aids to processing*, and specific machinery.
LUSTER: cotton, 34, 41, 74, 363, 433
measurement and improvement through better mercerization, 200
method for imparting to fabrics, P546
relation between luster, whiteness, and surface characteristics of textiles, 75
MACHINERY (see also *Cleaning of machinery, Maintenance, Materials handling, Metal detectors, Temperature* and specific machinery and processes)
cam constructions, 391
50 years of spinning improvements, 326
Machinery's handbook (book), 169
man-machine relationships, 73
panel discussion of developments, 310
review of 1953 developments, 28, 111
Russian innovations in preparatory and spinning machinery, 193
Swiss developments, 212, 292
MAINTENANCE (see also *Cleaning of machinery* and specific machinery)
gearing, epicyclic, 28
mill system, 265
organized system of personalized fixing, 310
parts cleaning program, 338
rust inhibitive primer, 391
MAN-MADE FIBER TESTING
determination of true tensile strength, 207
identification, 23
identification by means of solubility, 260
review of methods of fractionation of Perlon, Orlon and Terylene, 258
MAN-MADE FIBERS (see also *Acrylic fibers, Alginate fibers, Casein fibers, Cellulose, Polyamide fibers, Polyester fibers, Polyethylene fibers, Protein fibers, Rayon, Vinyl fibers* and under names of specific fibers and processes)
annual survey listing producers, denier and filament numbers, etc., 469
appraisal by retailers and consumers, 44
artificial fibers (book), 139
classification, 5
current problems and future trends, 283
development and uses, 323

MAN-MADE FIBERS (*continued*)
directory of world producers, 283
economics, 5
glossary, 233
production: copolymer with wool-like dye receptivity, P173
dope dyed: mill processing, 10
manufacture, 5
manufacture: review of 1953, 43
manufacture of superfine organic fibers, 516
review of chemical processes, 139
study of factors leading to production of fibers of high strength from a given material (using polyacrylonitrile), 283
variables to consider in looking for fiber-forming polymers, 283
review with table of characteristics of main fibers used in France, 323
structure and properties
chemical and physical aspects, 468
effect of heat, 469
properties and microscopical identification reactions, 493
properties in relation to processing into yarns, 194
review of properties, 139
structure and properties and need for chemical processing aids, 233
x-ray studies, 43
survey of economic and technical status, 469
table of data, including identification, 363
world production statistics, 283
MATERIALS HANDLING: aisle width planning for trailers, 170
bibliography of films, 446
MERCERIZATION, 104, 250
in acid-treated jute, 250
continuous, apparatus, P508
cotton, 377, P453
for improved luster, 200
minimum concentration of caustic, 58
practice, 298
tenter frame washing system for mercerizing ranges, P227
trapping lost profits, 59
MERYL: development and future, 233
METAL DETECTORS, 102
appliance for finding needles, etc., in fabrics and stopping fabric movement, 258
in opening, 7
protective device, P86
METALLIC YARNS, 476; aluminum, 369
MICROBIOLOGICAL DEGRADATION (see also *Mildew and mildewproofing, Rotproofing*)
bacterial growth on treated and untreated jute and other water pipe joint packing materials, 540
cellulose, 114
funginertness of 7 internally plasticized polymers, 345
humidity requirements for mould growth, 394
microorganisms which decompose cellulose, 501
resistance of resin treated fabrics, 76
review of mechanism of attack on cotton and bast fibers and prevention, 216
test for detecting effects of microorganisms and a microbial enzyme on cotton fiber, 260
tightlock of cotton, associated fungi, and pH values, 346
MICROSCOPES AND MICROSCOPY
attachments: camera lucida for evaluation of fabric construction, 210
cellulose research: review, 167
electron: cellulose acetate fibers, 163
fibers, 22
intermicellar system in cellulose fibers, 189
MICROSCOPES AND MICROSCOPY (*continued*)
ramie, 138
viscose rayon. 44
examining objects by means of phase contrast in colors and/or in polarized light, P548
mono-objective binocular microscopes for three-dimensional examination of fibers, 388
optical and electron: cotton fiber structure, 137
phase, review, 536
phase-contrast, 533
precision microtome for preparing cross-sections, 162
in processing and finishing, 265
Reichart fibroscope, projection microscope, 163
MILDEW AND MILDEWPROOFING (see also *Microbiological degradation* and *Rotproofing*)
development of analytical methods for fungicides, 540
efficiency of paradichlorobenzene in mildew control on shoes, duck, wool, etc., 270
estimation of copper-8-quinolinolate in mildew-proofed fabrics, 540
fungicidal compositions, P356
fungicides: stability to water leaching, 76
methods of inhibition of microbiological attack, 216
mildew-preventing activity of rhodanine derivatives, 395
mildew susceptibility of sizes, 13
study of efficiency of fungicides, 540
MILLING, see *Fulling*.
MILLS (see also *Air conditioning, Costs, Electrical equipment, Machinery, Quality control,* etc.)
advantages of windowless building, 266
British mill power plant, 211
circular design weaving mill, 497
design for a 600-loom cotton mill, 447
design for a 1000-loom cotton mill, 447
directories: Switzerland and Germany (books), 114
evaluating plant layout, 172
finishing plant, 447
industrial flooring, 537
industrial plant design, 171
laboratories, 71
lighting requirements, 537
maintenance set-up, 212
modernization plan for combed knitting yarn mill, 537, 538
setting up blended synthetic yarn producing plant, 266
shell roof construction, 266
suppliers control system, 538
textile mill designs, 340
training operators and raising output, 391
woolen mill job loads, 538
MIXING, 267
MODIFIED FIBERS, see *Fibers* and names of specific fibers.
MOISTURE RELATIONS (see also *Drying, Humidity*)
absorbed water in the fiber structure, 285
determination of moisture content of fibrous materials by Karl Fischer method, 161
determination of water retention of fibers and yarns, 67
diffusion controlled sorption of water in wool, 41
method for automatically regulating and measuring moisture content of textile materials, P356
moisture absorption and its influence on fiber properties, 92
moisture content of materials in bulk, electrical hygrometer, 27
moisture meters, 308
moisture regain and accessibility of cellulose derivatives, 394
moisture regain determinations from dissipation factor measurements, 167
relation between fiber microstructure and sorption phenomena, 7, 235, 284

MOISTURE RELATIONS (*continued*)
significance of fiber moisture absorption in dyeing and finishing, 285
sorption of water by soda-boiled cotton and comparison with viscose rayon, 466
MOISTURE REMOVAL, see *Drying.*
MOTH DAMAGE AND MOTHPROOFING
DDT for wool, 484
Eulan FL for wool, 155
feeding experiments with loose wool/chemical fiber mixtures, 345
Mitin FF 400 per cent, 105
mothproofing agents for wool, 18
non-wool textiles, 75
woolen goods, P39
MOVIL, 6, 469
MYLAR polyester film: properties, 44
textile application, 44
NAPPING
effect of twist on nap of Dacron blankets, 198
heat retentive napped fabrics, P124
production of nap fabrics, 153
tests of effect on fabric strength, 257
zero-energy napper speed nomogram, 440
NAPPING MACHINERY: high speed napper, 108
napper, P40, 160
Tri-raising machine, 386
NARROW FABRICS (see also *Braiding, Selvages,* and specific processes)
argyle gimps, 16
cloth roll mounting for narrow ware looms, P455
garment and furnishings trimmings machines, 431
loom for heavy conveyor belting, 523
looms, P81
polyvinyl compounds in woven belting, method, P275
scroll gimps, 16
small-ware looms, P123
tapes for hooks and eyes, P507
woven multi-ply, P458
NEPS
determining nep content of ginned lint with the mechanical fiber blender, 335
effect of relative humidity on neps in combed staple fibers, 236
influence of processing on formation, 368
Neptometer, 23, 335
Neptel imperfection counter, 443, 493
yarn imperfection counter, 388
NITRILON, 469
NONWOVEN FABRICS, P83, P84, P124, P353 (see also *Glass fabrics*)
bonded fiber fabrics, P124, 153, P226, 330, P353, P458, P508
bonding cellulose yarns to rubber, P226
felted layer, P124
fibrous webs, P83
general review, 198
machine for corrugating fibrous webs, P460
machinery, P178
noncorrugating fabric, P508
Pellon, 153, 432
process, P179
production, P458
resin coated, method, P317
NYLON
continuous filament as a reinforcement for worsted yarn, 233
deep freezing nylon yarn, P222
effects of irradiation on, 394
influence of repeated torsional deformations on birefringence of monofilaments, 469
nylon crepe, P459
processing 1½ denier fiber on the cotton systems, 423
NYLON (*continued*)
staple fiber processing, 240
surface investigation of filaments by an interferometric method, 412
tensile behavior of yarn, 25
OILING, see *Chemical aids to processing.*
OPENING (see also *Blending, Picking*)
checklist, 7
OPENING MACHINERY, P35, P451 (see also *Blending machinery, Metal detectors, Picking machinery*)
aerodynamic phenomena during fiber transport, 415
cleaning and opening fragile fibers, P315
feed apparatus, P271
feeding wool attachment, P35
hopper-feeder apparatus, P35
jet cleaners, 236
maintenance, 140
pipe switch for replacing reversing boxes in air lines, 236
preparatory fiber opener, P173
SRRL cotton opener, 415
Saco-Lowell No. 15 opener, 47, 140
Saco-Lowell No. 16-1 opener, 140
Shirley opener, 8, 416
single process opening and beating device, 48
suggested modifications, 236
vertical (or Crighton) opener, 47
Whitin axi-feed and axi-flo, 416, 471
OPTICAL BLEACHES, see *Bleaching.*
ORLON, see *Acrylic fibers.*
PARACHUTES
study of parachute deployment, fabric porosity, shape and type of canopy, 293
study of parachute suspension line impact load absorption under actual operating conditions, 293
PELLON, see *Nonwoven fabrics.*
PERLON: behavior in chemical reagents, 206
filaments: longitudinal swelling compared with human hair, 188
yarn: elongation and elasticity as function of time and stress, 241
PERSPIRATION FASTNESS: dyes containing copper, 63
PHOSPHORYLATED COTTON, see *Cotton, Chemically modified.*
PHOTOCHEMICAL DEGRADATION (see also *Lightfastness*)
of textile fibers with near ultra-violet and visible light, 382
of viscose rayon and other fabrics, 534
PHRILON: properties, etc., 234
PHYSICS (see also *Radioactive tracers, Static electricity, Ultrasonics*)
physicist's approach to textile technology, 33
physics in the dyeing, printing and finishing industries, 501
PICKER LAPS, see *Picking, Uniformity.*
PICKING (see also *Opening*)
checklist, 7
effect of lap preparation on waste extraction at the cotton comber, 417
locating picker faults through lap testing, 517
PICKING MACHINERY (see also *Opening machinery*)
doffing mechanism, P77
grid section of picker, P315
maintenance, 364
Saco-Lowell duplex air filter, 47
Tritex picker attachment: mill application, 364
PICKING (WEAVING) AND PICKER STICKS
analysis of straight picking motion apparatus, 477
automatic pick and pick motion, P80
jute and linen weaving, 98
picker, P81, P121
picker arrangements, P457
picker connection, P224
picker-stick, P176, P273, P400, P457

PICKING (WEAVING) (*continued*)
picker stick check, P122
picking mechanism for underpick looms, P82, P122
picking motion, P224
pneumatic picking motion, P122, P457
reading picks from pattern cards, P506
PIGMENT PRINTING, 20, P127, 435
compositions, P511
compositions containing thermo-hardening synthetic resin, P511
emulsions: thermoplastic resins in aqueous phase, P355
new developments, 530
principles and process, 301
for rayon and mixed fibers, 333
technique, 437
PILE FABRICS (see also *Carpets, Flocking, Terry fabrics, Tufted fabrics*)
apparatus for binding, P508
apparatus for patterned pile fabrics, P544
chenille: looms, 427
manufactured twisted core chenilles, P119
for cold weather clothing, P124
corduroy, 16; study of relation of fabric construction to physical properties, 375
knitting machine for, P274
looms, P81, P82, P400
fabric with projecting loops, P456
two pile fabrics face to face, minimizing vibration, P224
machines, P456
methods, P178, P456
mechanism for beating up of weft in pile fabric looms, P543
mohair pile sealskin, 480
pile cutting mechanism, P273
pile warp letoff attachment, P225
pile wire and method of weaving, P177, P456
technique for pile and plush weaving, 522
PILLING, see *Fabric defects.*
PIRNS, see *Winding machinery.*
PLEATING (see also *Setting*)
history, 481
wear testing program with 36 pleated skirts, 481
POLYAMIDE FIBERS (see also *Grilon, Nitrilon, nylon, Phrilon, Perlon, Trelon*)
fiber production for 6,6-, 6-10- and 6-polyamides, 234
free energy of formation of the amide bond in polyamides, 342
testing: distinguishing, 525, 532
POLYAMINOTRIAZOLES, 91, 284, 343
POLYESTER FIBERS (see also *Mylar, Terylene*)
modification of polyester filaments, yarns and fabrics, P353
POLYETHYLENE FIBERS (see also *Courlene*)
polyethylene terephthalate: effects of irradiation on, 394
technique for exposing internal fine structure of drawn monofilaments of, 258
POLYMERS AND POLYMERIZATION (see also *Cellulose* and names of fibers)
acrylics, 470
crystallization phenomena in fiber forming polymers, 314
emulsion, 74
high polymer physics, 393
linear, 343
synthesis and applicability of block and graft copolymers, 343
POLYVINYL FIBERS, see *Vinyl fibers.*
PRINTING (see also *Dyeing, Flocking, Pigment printing, Printing pastes, Screen printing*)
Acramine F process, 380
PRINTING (*continued*)
apparatus with rotatable table, P511
calico: Beka-copper plate method, 530
cotton: history, Europe, 160
flash aging speeds vat printing, 436
flocked fabric: screen or roller printing machinery, 101
history in Switzerland, 530
intaglio engraved rollers, P511
lint doctors, 255
photogravure process, 382
process, P318
production, P401
profitable operation, 436
review, 18
roller printing machines, P127, 381
spun rayon piece goods, 255
Terylene, 20, 159
Vigoureux, 439
wool, 160
PRINTING PASTES, P356
acrylate copolymers, P228
aniline black, 252
dyestuffs with substantive character, P402
insoluble azoic dyes, 158
phthalocyanine, P356
preparing novel polycarbamides or polyurethanes, P355
physical properties and printing behavior, 64
production of colors and pastes, 255
thickeners, 385
water-in-oil emulsions, P40
PROOFING, see *Creaseproofing, Flameproofing, Mothproofing, Resin finishing, Shrinkproofing, Waterproofing, Weatherproofing.*
PROTEIN FIBERS (see also *Ardil, Blends, Casein fibers, Hair fibers, Silk, Vicara, Wool, Zein fibers, Zycon*)
chemical denaturation of groundnut protein, 187
manufacture, 44, 516
production of casein and peanut protein fibers, 412
properties, 516
QUALITY CONTROL (see also *Costs, Sampling, Specifications, Statistics, Time study, Uniformity*)
application in the plant, 392
cellulose acetate manufacture, 29, 171
control chart applications, 72
control chart limits for means, ranges, and sequential runs, 310
control charts in card room, 8
control of laboratory testing, 339
cost reductions through, 392
count control on a roving frame, 29
hosiery finishing plant, 29
knitting: alignment charts, 55
knitting yarns, 443
quality bonus system for spinners and weavers, 212
rayon weaving mills, 171
sizing, 53
statistical, 73, 447
papers and bibliography (book), 212
statistical aids in locating machine differences, 339
summary graphs showing mill operations, 339
for textile mills (book), 111
waste control, 171
weaving: yarn consumption, 100
worsted mill program, 392

SETTING (see also *Coronizing*)
alternate steam and vacuum for nylon yarn packages, 371
apparatus for fabrics, P512
heat: glass fabric webs, P39
N-alkyl polyamides, P84
nylon textiles, 439
synthetic fiber fabrics, 334
Terylene, 21
investigation of mechanisms of swelling and of setting 66-nylon yarns, 412, 413
machinery: nylon, P128, P512

SETTING (*continued*)
nylon and Perlon setting, 249
pleat: RABO high temperature steam permanent pleating cabinet, 531
Sanderson pressure steam system for nylon, 21
spun acetate: radical temperature change before boil-off, 438
steam: apparatus for nylon yarn packages, P221
twist: a basic study, 475
nylon ply yarn, P86
wool fabrics, P86
SEWING
home sewing techniques for synthetic fiber fabrics, 152
problems in sewing synthetic fiber knitted and woven fabrics, 295
sewability tests, 110
SEWING THREAD: nylon, P399
Orlon: for canvas products, 52, 242
SHEDDING
advantages and disadvantages of late or early shed closing, 371
crossing of threads in shedding, 149, 328
mechanism, P543
mechanism for circular looms, P122
motions, 14
shed timing, 55
SHRINKAGE (see also *Fulling*)
circular plain knit fabric, 428
control, 26
correlating laboratory shrinkage methods with home and commercial practice, 264
cotton broadcloth shirts, 66
determination of the regularity of the shrinkage of yarns, 336
equations for calculating shrinkage from yarn thickness and cloth thickness, 263
measurement, 26
study of shrinkage of warp and weft yarns, 293
textile shrinking apparatus, P510
velours, finishing processes, 379
wool: influence of applied forces, 3
measurement, 3
procedure for felting shrinkage tests, 306
SHRINKPROOFING, 102
Cet, cycloaliphatic compound, 526
cotton: processes, 527
testing methods, 527
treating with Lyofix CH, 379
man-made fibers: manufacture of dimensionally stable synthetic textile materials, P275
processes, 155, 306, P354, P509
resin impregnations, 201
viscose: Avcoset process, 526
six methods for stabilizing viscose fabrics, 332
wool, P77, P227
acid colloidal solutions of methylated methylolmelamines, P354
chlorination processes, 59, 249
deacetylated chitin, P83
Drisol process, 105
Dylan alkaline treatment (Sanforlan), 332
ethanolic potassium hydroxide to pretreat wool for application of *N*-alkoxymethyl polyamides, 483
ethoxymethyl nylon applied from aqueous dispersion, 380
methods, 105, 201
N-(hydroxymethylene) adipamide, 57
organic bromamines, 4
processes, 526
relaxation shrinkage during soaking in water and Hoffman pressing, 200
Si-Ro-Fix nylon process, 105
with sodium hypochlorite, 18
SHRINKPROOFING (*continued*)
with substituted polymers of ethylene, P227
SHUTTLES, P81, P121, P224, P225, P507
block devices, 196
brush and holder, P177
checking mechanisms, 54, 149, P316, P544
cop holding device, 244
driving mechanism, P123, P317
expeller, P544
gripper shuttle, P506, P543
guide, P177
increased production in wool mills with larger shuttles, 372
laminated, 100
maintenance, 13
propulsion, 150, 196, 245, 328
releasing device to fix the position in shuttle box, 244
spur, P352
swells, 245, 371, 427
timing, P121
wear, 291, 426
SILICONES, 161 (see also *Chemical aids to processing, Resin finishing*)
method of forming textile materials, P458
slasher can anti-sticking, 97
textile treatment, 66
SILK: anti-degradation quality of resin-treated silk fibers, 380
chemistry, 282, 411
modification by formaldehyde, 380
soluble protein of silk gland of silk worm, 31
tensile behavior of yarn, 25
SINGEING: means for singeing threads, P221
SISAL, 91; rigidity, 411
SIZING AGENTS, P37; aqueous solutions of cellulose acetate, P222
carboxymethylcellulose: applications, 65
carboxymethylcellulose: sorption in Vinylon and rayon staple, 53
Courlose (CMC), 12
elvanol polyvinyl alcohol for synthetic fibers, 522
evaluating warp size in the laboratory, 242
for fibrous glass articles, P399
methods for testing suitability of a product for use as a sizing agent, 242
mildew susceptibility, 13
properties, 12
rayon yarn, 195
siccative resins, P399
Solvitose, 195
starches, 477; degradation evaluation by iodine staining, 12
modified, 195
sizing power of pure and dextrinized, 53
tapioca, 522
survey, 97
tamarind kernel powder, 13
testing: viscometers for sizes, 242
SIZING, P227 (see also *Desizing, Slashing*)
advances, 195
backsizing for carpets, 52
controlling degree of yarn stretch, P454
controlling size-cooking pressure, 425
cotton, 53
ethylene polymer structures, P176
glass, P119, 482
Hycar sized denim, 376
influence of the drying temperature on the solubility of sizes, 477
method of starching fabrics, P546
nylon: water-insoluble warp yarns, P454
Pacolet system, 13
processes and control, 12
rayon: colored warp, 54

SIZING (*continued*)
properties of starched yarn bundles, 425
size preparation system, 242
warp, 12, 53, P179
sizing power and elasticity of sizes, 53
staple fiber yarns: behavior, 148
studies, 12, 53, 149
tension control in warp sizing, 97
textile bearing a starch size, P546
warp sizing method, P176
SIZING MACHINERY: control systtem for varying speed of warp yarn according to tension and moisture content, 243
determination of warp tension, 370
equipment for making slasher size, 242
McBride backsizers for carpets, 332
QP Shirley metering pump, 53
reeds for preventing overlapping, 195
Shirley automatic size box, 327
warp, P272
SLASHING AND SLASHING MACHINERY: checking slasher performance, 424 (see also *Sizing*)
drying device for jute and flax, 194
equipment, 328
filament-fabric shadow streaks from uneven slasher tension, 327
interchangeable press rolls, P37
silicone resin coatings for anti-sticking, 97
waxing warps with and without sizing, 425
worsted/synthetics gabardines, 426
SLIVER (see also *Carding, Drawing, Laps and lapping, Uniformity, Yarns*)
coiling apparatus, P37
condensing, P78, P271
control of worsted sliver production, 148
feeding apparatus, P541
Saco-Lowell coilers, 417
sliver cans, P451
statistical study of fiber distribution in random slivers, 238
SOAP, see *Detergents.*
SOILING AND SOIL (see also *Detergents, Laundering, Washing*)
carpet, 73
determination of soil-suspending power of detergent-active substance, 342
electron microscope technique in study of the washing process, 312
evaluation of test soiling materials, 308
improvement of the dirt-suspending power of carboxymethylcellulose, 343
interrelation of water, detergent, dirt, 344
laboratory techniques, 312
study of some proteins and neutral synthetic polymers in inhibiting redeposition of soil on cotton, 297
of textile materials: discussion of problem, 312
theory of soil-fiber complex formation and stability, 74
SPECIFICATIONS: conformity limit calculation, 264
industrial specifications (book), 267
technical significance of government specifications, 502
SPINDLES, P117, P271; automatic clutches for ring spindles fitted with anti-ballooning caps, P452
bearing, P125
bobbin: change speed gear, P117
bobbin clutching, P175
double twist, P542
double twist: bearing, P542
high-speed, P117
lubrication device, P271
drive, P117
mechanism of worm and worm wheel drive type, P542
mounting, P36
SPINDLES (*continued*)
multiple twist: magnetic system for, P350
oil cups for bearings for heavy yarn packages, P350
Whitin ball bearing, 288
Whitin dinamic, 474
SPINNING (see also *Balloons, Doffing, Friction, Tow to top, Uniformity, Waste*)
can spinning system, 473
centrifuge spinning, 94
control through yarn uniformity testing, 240
cotton (book), 47
cotton varieties: tests, 2
discussion by wool mill men, 237
end breakage: causes and control, 288
fiber movement, 94
limits of spun rayon (effect of denier and staple length), 192
metallic staple in blends, 325
method of processing card sliver directly into yarn by single ring frame operation, P219
mule, 145
nylon staple, 148, 422
Perlon staple: length of drafting zones and weighting of rollers, 367
pot system: thread tension nomogram, 10
Pross-Baldus one-flyer system, 9, 367
ring: limitations to production, 474
ring: spinning regulators, 368
staple-fiber yarns: faulty roller adjustment, 49
tension: influence of coefficient of friction, 192
Terylene, 148
theory: statistical aspects, 94
Thieron double ring system, 474
wet, natural fibers, P36
worsted: wools, man-made fibers, and blends, 520
SPINNING MACHINERY, P117 (see also *Balloons, Bobbins, Cleaning of machinery, Creels, Doffing, Drawing machinery, Spindles, Tension devices, Tow to top, Travelers, Uniformity, Waste, Yarn guides*)
automatic multiple spindle machine, P350
cleaning, 30, P175, 421, P505
control for spinning frames, P315
guide for spindle or ring rails, P453
Gwaltney system: Saco-Lowell SG-1 frame, 144
modernization, 288
mule, 49, 95, 288, 289, P398
new equipment, 48
ring: automatic doffing and bobbin replacing, P220
building motions, P398
knock off mechanism, P220
mounting self-lubricating ring, P79
protective casing for a roller twisting head, P220
rings, P117, P453
self-lubricating spinning and twisting rings, P221
woolen, cotton, worsted, P542
rolls: coupling of aligned rollers, P78
pressure, P453, P504
toothed for wool spinning frames, P542
top roll, P118
sectional, P504
staple: machinery modification, 325
tension pulleys, P118
thread guide traverse mechanism, P351
Whitin Superflex spinning frame, 143
wool: ringframe, 326, 421, P542
Whitin Flex-Spin model E frame, 145
worm drive, P79
worsted: Saco-Lowell SS-4 frame, 145
Spima frames, 145
yarn guide, P453
SPOOLING, see *Winding.*
SQUEEZING EFFECT, see *Drying.*
STABILIZING, see *Shrinkproofing.*

STAINS, see *Fabric defects, Finishing.*
STANDARDS: British Standards Institution, 216
STARCHING, see *Sizing.*
STATIC ELECTRICITY (see also *Anti-static agents, Chemical aids to processing*)
capacity, dielectric constant, and power factor of fiber assemblies, 172
charges on various fibers, 34
directional triboelectric effects of wool, 410
discharge processes for textiles, 74, 75, P459
electrical properties of textiles, 215
electrostatic effects in fiber filters for aerosols, 172
electrostatic phenomena in textiles, 344
electrostatic series, 75
factors affecting electrostatic charge of fibers in finishing and processing, 113
general survey, 450
measurement, 75, 113; apparatus, 34
machine: for acetate fabric, 534
rotating static Schwenkhagen voltmeter, 394
static tester for yarns and finishes, 536
triboelectric response of raw cottons, 501
occurrence, behavior and elimination on textiles, 344
problems, causes, elimination, 394
problems affecting knitting, 345
reducing static through staple blending, 75
static electrification of filaments, 216
static eliminators, 34, P356, P543
use of in opening and cleaning cotton, 466, 501
STATISTICAL QUALITY CONTROL, see *Quality control.*
STATISTICS (see also *Quality control, Sampling, Testing*)
application of statistical techniques to ASTM standards, 536
analysis of variance, 112
linear programming, 311, 445
methods in textile research (book), 337
short cut, 445
single sample multiple decision procedure for ranking means of normal populations with known variances, 168
specifications for calculation of statistical values from a series of measurements for an accidentally variable magnitude, 536
statistical methods for Poisson processes and exponential populations, 310
statistical tools for testing, 446
work sampling technique, 29
STEAMING: effects on rayons, 65 (see also *Setting*)
STOP-MOTION DEVICES (see also under specific machinery)
electric, P399
machine stoppage recorder, 391
remotely controlled, P220
strand machine, P543
web feeding means, P179
yarn processing machines, P271, P508
STREAM POLLUTION, see *Waste treatment.*
SURFACE ACTIVE AGENTS, see *Textile chemicals.*
SYNTHETIC FIBERS, see *Man-made fibers.*
TAR SPOTS: removal from cotton fabrics during finishing, 331
TEFLON: coatings on textile machinery, 71
properties and uses, 413
TEMPERATURE: Cambridge surface pyrometer: temperature of machinery surfaces, 210
effect on textile materials, 189
TEMPLES, P225; brackets, 328
fittings, 245
recent developments, 245
special, 373
TENSION DEVICES (see also under specific machinery)
tension analyzer, 336, 443
tensioning mechanism for moving webs, P128
web tension device, P274, P545
TENSION DEVICES (*continued*)
yarn, P36, P37, P80, P223, P271, P399, P400, P442, P508
TENTERING MACHINERY, P511, P547
German frame, 531
straightening and ironing selvages of wool or blends before tentering, P228
TERRY FABRICS: beating up mechanisms for terry towelling, P223
development, 524
high-speed loose reed towel loom, 292
weaving quality towels: mill procedure, 329
weaving terry towels: four-pick weave, 15
TERYLENE polyester fiber, 44
chemical treatments to improve dyeability, 62
development, 284
industrial uses, 413
manufacture: drawing, 187
TESTING (see also *Abrasion, Chemistry, Fabric testing, Fiber testing, Fluorescence, Friction, Microscopes and microscopy, Quality control, Time study, Yarn testing*, and under specific fibers and processes)
ASTM standards on textile materials (book), 535
bending resistance tester, 69
control of quality and uniformity of laboratory testing, 339
measuring device for textile materials, P460
mill laboratories, 71
test specifications for handling test errors, 70
worsted mill testing program, 337
TEXTILE CHEMICALS (see also *Acrylonitrile, Chemical aids to processing, Detergents, Dyes, Finishes, Sizing agents* and under specific processes)
analysis and classification, 209
chemistry and textile uses of sequestering agents, 447
comparative tests for textile assistants, 264
cyanamide and its derivatives, 450
evaluation and bibliography, 448
glyoxal and its derivatives on textiles, 172
industry: relation to fiber production, 346
softener and flame-resistant coating composition, P546
textile auxiliaries: analysis and classification, 209
TEXTILE INDUSTRY (see also *Costs, Mills*)
vertical and horizontal organization in dyeing and finishing sections of British textile industry, 502
TEXTILE PRODUCTS (see also *Fabric products, Yarn products*)
product evaluation by scientific methods, 71, 348
TEXTURED YARNS: Taslan, 369, 428, 520
yarn bulking processes: Helanca, Taslan, Banlon, Fluflon, 520
TEXTURIZING: Shepardene process, 21
THREAD, see *Yarns, Yarn products.*
THROWING, see *Twisting.*
TIME STUDY: work sampling technique, 29
TINTING, see *Fugitive tinting.*
TIRE CORD: determination of bone-dry strength and elongation-values of rayon tire cord, 336
protection against heat aging, P35
testing, P40
TOPS, see *Tow to top.*
TOW TO TOP, P115, P119, 288 (see also *Spinning*)
conversion systems, 325
Cut-dra-fil, 95, 518
cutters, P77
direct spinning, P272, 367, P452, 518
draft-cutting: fiber length distribution, 238
glass fibers and artificial fibers: spinning without carding or twisting machines, P115
heat-stretch method, 95
hi-bulk Acrilan yarn by Perlok and Warner & Swasey converter methods, 475
Orlon: 60-40 relaxed-unrelaxed Orlon top, 424

TOW TO TOP (*continued*)
Pacific converter, 95, 424
rayon: relation of filament orientation and characteristics of tops, 51
Rotofil spinning, 518
Stains direct spinner, 145
Turbo stapler, 424
uniform tension in tow, P453
TRAVELERS, P351; blind traveler coupled to operative traveler, P542
different weights, 144
magnitude of friction between traveler and ring, 239
observation during spinning, 192
plastic, 421
TRELON, 6, 91; mixed polyamide fibers Eftrelon, Wetrelon, etc., 470
TUFTED FABRICS, P275, 525 (see also *Carpets*)
chenille tufting machine, P274
loom for tufted pile fabrics, P37, P82, P506
severing machines, P38, P317
weft stop motion for tufted pile fabric looms, P177
TWIST (see also *Setting*)
angle of twist, 422, 475
chart for finding twist multiplier for maximum strength, 494
drying twist of plant fibers, 1
effect: on filament yarns, 51, 193
on nap of Dacron blankets, 198
on yarn quality, 241
effect of single and ply twist: on properties of a 15.5/2 carded cotton yarn, 193, 326
on properties of 31/2 cotton carded yarn, 50, 326
effect of varying: on mechanical properties of 3-denier 2-inch X-51 staple fiber yarn, 193
false, P118, 144, 326
graph for calculation of twist values for American and Egyptian cottons, 261
measurement of twisting moment in fibers and yarns, 443
nomograms for calculating yarn twist, 533
relationship between yarn number, twist and contraction in combed cotton yarn, 193
relationships with tensile strength, regularity, and elastic behavior, 97
reversible twist and bending phenomena, 235
temporary twist in roving and spinning, 144
twist tables and their use in actual practice, 240
TWISTING: French Chomarat process, 95
how to throw Helanca, 422
simultaneous twisting and drawing of fibers, 287
tricot yarn throwing, 422
woolen and compound yarns, 475
TWISTING MACHINERY, 10, P36, P118, 326, P542
centrifugal clutch, P118
Clemson pre-twister, 144, 325
double-twist spindle devices, P220
double twist spindles: tension device, P351
down-twister, 145
flax, 94
guide for spindle or ring rails, P453
hank, P399
high speed twisting and drawing head, P78
Saco-Lowell model 4 twister, 146
tensioning device, P36
twisting head, P505
two-for-one twister, 289; Deering-Milliken, 96; Landolt, 368
uptwisters, P79, P221, 289
heavy duty, 475
mechanism for building yarn packages, P505
Whitin pacemaker ring twister, 146
Whitin ply-king and cable-king uptwisters, 146
TWISTING-IN, see *Warping*.

ULTRASONICS: in bleaching, 490
in dyeing, 490
processing possibilities, 450
review of ultrasonics in textile industry, 540
ULTRAVIOLET LIGHT, see *Fluorescence*.
UNIFORMITY
fabrics: relation between yarn and fabric regularity, 101
two methods for measurement of regularity, 26
laps: apparatus for testing, P276
picker laps: causes and effects of unevenness, 364
effect of variation on subsequent processes and means of improving, 30
locating picker faults, 517
variation tester, 416
roving: effect of draft distribution on Saco-Lowell J-3 roving frames, 142
sliver: analysis of regularity in drafting, 304, 365
causes of irregularity, 419
causes and prevention of irregularity, 419
effect on uniformity of varying swift speed and rate of production in carding, 190
Fielden card regularity recorder, 442
importance of position of card sliver in can, 364, 365
irregularity, 442
irregularity in wool carding, 141
irregularity in wool drawing, 142
machinery modifications to reduce variation, 365
relation between variation of density and thickness of slivers, rovings and yarns, 475
relation of sliver to drafting force, 142, 239
unevenness in relation to irregular motion of the apron band, 473
Uster tester in card room, 109
sliver lap: control of yarn uniformity at the sliver lap, 473
device for correcting irregularity, 190
yarns:
comparison of variance length curves given by Uster tester and by cutting and weighing (worsted yarn), 208
determination of B-L curve by cutting and weighing (worsted yarn), 208
effect of machine passages on regularity, 237
factors affecting regularity, 421
influence of roller eccentricity, 325
irregularities of direct and Perlohrk spun yarns, 424
irregularity caused by yarn: condenser serving as intermediate roving guide, 48
relation of fiber movement during drawing and twisting to non-uniformity, 94
statistical aspects of uneven mixing during doubling in drawing, 50
uniformity of combed wool yarns, 52, 147
use of uniformity analyzer to correct defective spinning, 240
use of Uster tester in finding variance length curve of worsted yarn, 207
variations caused by off-size, slipping and eccentric rolls, 421
yarn testers, P130, P318, P547, P548
British Rayon Research Association yarn irregularity recorder, 442
Brush automatic evaluator, 24
capacitance methods (book), 494
electronic fluff detector for continuous filament yarn, 262
measurement by means of high-frequency condenser field, 261
mechanical tester, 69
methods and apparatus for measuring changes, 262
photo-electric cell apparatus, 24
SY regularity tester, 240

UNIFORMITY (*continued*)
Uster tester, principles and uses, 207, 208
Uster tester and integrator, 69
VESTAN: German vinylidene and vinyl chloride mixed polymer, 517
VICARA: data sheets, 234
VINYL FIBERS (see also *Movil, Saran, Vestan, Vinylon*)
identification reactions of polyvinyl fibers, 309
reactivity and detection of polyvinyl compounds, 445
sorption phenomena of polyvinyl alcohol fibers, 7
VINYLON: development, 284
manufacture, 188
manufacture of fibers with various cross section forms, 516
tensile recovery, 413
VISCOSE RAYON: continuous filament viscose from storage through weaving, 523
crimped Phrix viscose staple, 6
French improved regenerated cellulose fiber, 283
longitudinal swelling of filament compared with human hair, 188
manufacture, 234
measuring swelling of monofils in aqueous solutions, 414
sorption phenomena, 7
structure: electron microscope, 44
tensile behavior of yarn, 25
WARPING, P272 (see also *Sizing*)
advantage of intermittent warping, 370
calculations, 14
color marking system for tricot, 12
colored rayon warps, 54
direct and indirect twisting-in, 422
improvements, 12
method of regulating a thread separating device for a warp, P506
rayon filament, 13
tension in warping of rayon crepe yarns, 243
Terylene, 98
WARPING MACHINERY, P120, P176, P222, P272 (see also *Creels, Slashing*)
beams, P223, P351, P400, P506
beam warping apparatus, P222, P316, P351, P454
drawing-in machine, 52
driving device, P351
examination of 41 different yarn tensioners, 243
flanged beams, P121, P223
photoelectric control device, 195
reeds for preventing overlapping, 195
Schlafhorst DSB pattern warper, 12
section warping machine, P399
separator for leased warp threads, P37
stop motion, 290, P399
tensioning, P399
warp tying machine, P272, 425, 521
WASHFASTNESS: fixing water-soluble organic compounds on textiles, P84
resin finishes, 65
testing apparatus Prexa, 211
testing and measurement on colored fabrics, 169
testing procedures for determination: dyes, dyed materials, and prints, 211
testing regulations for dyed and printed fabrics, 534
WASHING (see also *Detergents, Laundering, Scouring, Soiling*)
apparatus for washing fabrics without tension, P125
chemical effect of washing agents on cellulose fibers, 432
effects of temperature, time, and washing agents, 27
electron microscope technique for examination of soil particles, 312
mechanical and chemical damage to fabrics, 103
method and apparatus for accelerating action of treating solution, P402
WASHING (*continued*)
two-drum washing machine and effect on washed articles, 103
WASTE (see also *Cleaning of machinery* and specific machinery)
control in the mill, 171
control program for cotton spinning room, 30, 497
relationship between amount of waste and degree of draft, 287
WASTE TREATMENT: biological treatment of wool dyeing waste, 30
chemical precipitation of textile wastes, 340
critical review of literature of 1953 on sewage, waste treatment, and water pollution, 213, 311
estimation of BOD of wool scouring waste by a rapid COD determination, 289
making wastes survey of industrial waste waters, 213
measuring oxygen depletion of textile wastes, 69
oxidation of cotton kier wastes, 392
oxidation of enzyme desize and starch rinse textile wastes, 538
pollution reduction in cotton finishing through process chemical changes, 497
pollution sources and reduction through process chemical changes in wool scouring and finishing, 498
stream pollution by textile waste, 31, 69
technical problems, 213
treating desizing waste for sewage disposal, 498
treatment, 31; of wool scouring waste, 30
use of packing in biological treatment of textile waste waters, 311
vibrating screen separators for woolen mill wastes, 538
WATER: accumulator storage methods, 28
boiler water chemistry symposium, 211
process water and treatment for the textile mill, 267
WATER POLLUTION, see *Waste treatment.*
WATER-REPELLING, see *Waterproofing.*
WATERPROOFING: composition, P84, P85, P460, P545
cotton: SRRL research, 331
dilute aqueous aluminum- or zirconium-containing paraffin emulsions, 434
method, P227, P545, P546
paraffin emulsion, P126
Perlon, 379
reproofing clothing with solvents or aqueous solutions, 66
siloxane compositions of superior permanency, P276
urea or thiourea condensation products, P126
water-repellency finishing, 102
WEAR, see *Abrasion* and specific subjects as *Clothing, Fabrics,* etc.
WEATHERPROOFING: effect of various compounds on viscose rayon, etc., 534
WEAVES, see *Fabric design.*
WEAVING (see also *Carpets, Fabric design, Looms, Narrow fabrics, Pile fabrics, Selvages*)
acetate fabrics, 523
avoiding defects in weaving filament rayon, 100, 150
cloth setting milled worsted cloths, 480
cloth setting of different twill weaves, 431
control of yarn consumption, 100
cotton and linen (book), 197
double cloth fabrics: woven moire effect, 293
end breakage and yarn tension, 370
endless tubular fabric, P125
finishing processes in relation to cloth setting, 431
jute and linen: beating-up the weft threads, 328, 478
kinky filling yarn, 522
layout for random stripes, 150
loom preparation in rayon weaving, 372
methods of weaving with several weft threads, 55
nets: with shuttle and mesh stick, P122

WEAVING (*continued*)
optical apparatus for detecting broken threads, P82
process for elimination of frequent weft changing (fabric with double wefts), 291
raised fabrics, P122
rayon honan (filament warp and spun yarn filling), 294
reducing broken picks, 426
removable carrier threads, 15, 56, 153
set mark eliminator, P38
short-cut methods to check new cloth patterns, 248
silk or synthetic repps: inspection program, 329
tension control for Bemberg yarns, 99
warp tension, 522
warp tension measurement, 13, 373
weave-room organization, 427
weaver jobloads, 99
weft-backed fabrics, 150
wool mill practice, 329
worsted-synthetic gabardines, 426
WEAVING MACHINERY, see *Looms.*
WEFT MECHANISMS: beat-up for fly shuttle looms, P177
detectors, P82, P123, P177, P352
device for insertion of different selected wefts, P223
feeler motions, 427
filling reserve, 426
optical recording of yarn tension in weft winding, 261
parting mechanism, P37, P177
protector, 55
replenishing mechanism, P82, P120, P316, P506
replenishing: multi-color, P273
replenishing: thread holder having geared members for weft ends, P273
separation of wefts in multibox looms, P506
stationary weft supply, P456
unconventional methods of insertion, 427
WINDING (see also *Knots and knotting*)
calculations, 14
cheeses: methods, 289
pirn-winding study, 425
quiller department control system, 371
rewinding and requilling filling yarn, 243, 422, 522
spool assembly and operating mechanism, P317
spoolers: increasing efficiency on automatic, 326
Terylene, 98
theory and practice, 50
WINDING MACHINERY, P36, P79, P80, P175, P222, P315, P316, P351, P455, P542 (see also *Bobbins, Twisting machinery*)
Autocopser ASE automatic quiller, 97
automatic doffing, P178
balling machine, P37
bobbin winders, P79, P175, P222
doffed package delivery, P119
drive, P36
feeding to multiple unit winding frames, P222
forming reserve windings, P351
multiple unit, P79
short traverse mechanism, P120
Whitin speed-matic automatic filling, 146
building motion, P175, 425
cheese, P454; cones for, 289
quick traverse, P222
split drum, P455
stop motions, 96
cone: Foster model 202, 98
Giroconer, 326
holder with locking means, P505
control devices, P274, P398, P459
cop, P119, P271
cross-winding, P79, P506; thread traverse guides, P454
feeding in skein winding, P119
hanks, P119
helix of thread on mandrel, P118
WINDING MACHINERY (*continued*)
lap, P217
motor drive unit, P505
pirn, P120; depositing ejected pirns on pirn skewer board, P351
feed traverse mechanism, P455
screw mechanism for effecting traverse of yarn guide, P222
traverse changing mechanism, P223
pneumatic removal of fly, P120
side drawing device, P36
slub catcher, P271
spare ends of yarn in looms, P224
spool, P118; electric motor control, P454
holding device, P272
starting devices, P399
stop motion, P36
tail cutter, P221
tension devices, P119, 146, P459
tester: constant tension continuous winding, 442
thread guide pressure regulator, P36
transfer tail, P175
transfer tail on bobbin on spinning frame, P542
traverse mechanisms, P79, P221, P455
twist control means, P36
unwinding, P79, P120; bobbins in looms, P123
cake expander for, P79
cheeses, and rewinding into bobbins, P505
and releasing means for warp beam, P272
warp during weaving, 55
web, P83, P125, P179, P226, P317, P459, P508
weft, 426; optical recording of yarn tension, 261
Whitin speed-matic winder, 422
yarn handling means, P453
WOOL FABRICS: characteristics, 523
effect of chlorination processes on wear life of wool, 59
influence of the dyeing method on wool wearing properties, 156, 437
wool jersey, 375
woolen coatings, 16
worsted features in woolens, 154
WOOL FIBERS: action of chlorite and chlorine dioxide, 4
action of strong solutions of urea containing reducing agents, 498
bilateral asymmetric deposition of gold, 361
bilateral asymmetry of the distribution of melanin in pigmented wools and correlation with crimp, 322
chemical changes during wet processing, 484
comparison of mechanical properties between and within several breeds of sheep, 361
creep in water, 468
crimp: effect on mechanical properties of wet wool, 362
diffusion controlled sorption of water, 41
directional triboelectric effects, 410
distribution of cystine in cortex, 362
disulfide bond reactivity, 42
effect of boiling in aqueous solutions, 42
effect of ortho-phenol, 323
effect of oxidation and reduction processes on properties, 281
electrical resistance, 90
fiber area per unit area of skin in the Ossimi sheep, 468
modification with beta-propiolactone, P115
polymer formation in, 90
properties for specific end-uses, 515
purification, 43
reaction with organic bromamines, 4
reversible twist and bending phenomena, 235
selective absorption of optical antipodes, 282
staple lengths for grades of grease wool, 4

WOOL FIBERS (*continued*)
stress relaxation of wool keratin in water and in salt solutions, 468
structure, 3, 186
terminal carboxyl groups of wool keratin, 323
theory of sorption of dyes and acids, 281
water absorption capacity of acid-containing wool, 89
wettability, 282
WOOL TESTING: air-flow method of measuring fineness, 440
alkali solubility as a measure of sulfuric acid degradation, 515
alkali solubility test for wool degradation, 59
chemical change determination by cystine analysis, 532
detection and measurement of wool modification, 70
determination of residual wool grease, 108
determining changes in utility resulting from dyeing, 156
diameter measurement, 162
ellipticity measurement, 162
method for estimating cystine content, 532
methods of length measurement, 532
paper chromatographic examination of amino acid composition of wool hydrolysates, 70
paracortex and orthocortex and Allworden reaction, 3, 73
solubility in acid test for determining changes, 108
solubility in urea-bisulfite solution and its use as a measure of modification, 493
stress-relaxation curves: use of tangentometer, 23
WOOL YARN: aging top and roving produced on the French worsted system, 419
compound woolen and worsted, 290
effect on mechanical properties of aging of worsted yarn, 521
predicting weavability of combed yarns, 147
properties and uses of woolen and worsted spun yarns for hosiery, 289
use of colored fibers in the wool industry, 476
use of continuous filament nylon as reinforcement for worsted yarn, 233
woolen twist yarns, 424
WRINKLEPROOFING: cellulose fibers, 526
coating composition, P85
method and composition, P510
X-RAY: study of microstructure of fibers, 43
YARN CLEARERS, P400 (see also specific machinery)
with knot control, P507
knot or slub catching devices, P399
micro-adjustment, 370
YARN GUIDES, P505, P543 (see also specific machinery)
split, P175
telescopic supporting device for, P504
YARN PROCESSING (see also *Applicators, Knots and knotting, Textured yarns, Tow to top,* and specific processes)
apparatus for compressing yarn on the ends of tubular packages, P397
apparatus for depositing thread packages into a magazine, P397
apparatus for treating impregnated roving and yarn, P125
bundling hanks of yarn, P453
device for producing fluffy threads, P226
device for treating yarn, which is being wound, with a liquid, P226
fluid treatment apparatus, P39
handling device, P39
hydraulic yarn bundling press, 97
methods and apparatus, P508
package support, P126
preparatory procedures, 370
YARN PROCESSING (*continued*)
process of treating rayon cakes, P509
range for synchronizing beaming, yarn dyeing and slashing, 148
stretching frames for thread, cords, etc., P221
tensioning and drying, P126
YARN PRODUCTS, see *Cordage, Parachutes, Rope, Sewing thread, Tire cord.*
YARN TESTING, 262 (see also *Abrasion, Friction, Neps, Uniformity,* and specific fibers)
air drag, 164, 192
apparatus for dynamic continuous stress with superimposed varying load, 165
Baer automatic thread strength and elongation tester, 164
continuous thread tester, P356, P548
correlation of yarn and fiber strengths at different gage lengths, 68
determining elastic elongation, 442
feeding successive lengths to testers, P130
flexural rigidity determination of filaments and yarns, (vibrating reed method), 305
impact tensile strength of yarns, cords, fabric strips, 167
load extension curves for viscose and acetate, silk, nylon: recording instruments, 25
new method for checking and calibrating Scott inclined plane tester, 262
Parallex, measuring parallelization and uniform distribution of fibers in sliver or roving, 165
tensile strength tester, 337
testing devices to show changes in elongation properties due to yarn tension, 260
Vitno-winder for yarn appearance, 25
wire strain gauge type tester to measure load-deformation, 390
yarn weavability, 164
YARNS (see also *Abrasion, Blends, Friction, Knots and knotting, Roving, Sliver, Textured yarns, Twist, Uniformity, Yarn products* and specific fibers)
bonded: method for making continuous twistless bonded yarn, P505
change in number of fibers in stretched yarn, 240
constant rate of loading (silks and rayons), 24
correlation between yarn elongation and thickness, 240
device for the production of fluffy threads, P350
effect of coarse fibers on yarn quality, 11
effect of physical properties of the fibers on yarn characteristics, 369
effect of temperature on, 189
effect of the manufacturing system on yarn characteristics, 369
Enkalon (high-elastic): manufacture, properties, and applications, 241
fiber distribution, 10, 165
filament: analysis of results of a visual test, 109
handling defects, 326
fine-count compound, 11
novelty: uses, 295
nub, ratine and boucle, 424
plied: quantitative analysis of factors determining strength of cordage and plied yarns, 519, 520
pre-dyed stretch yarns, 437
reinforced elastic yarn, 241
relation between electrical resistance and dielectric constant, 172
relationship between partial and total elongation, 240
simple method of comparing the breaking loads of two yarns, 336
spun rayon: effect of denier and staple length on spinning limits and strength, 192
strain distributions among the fibers in the yarn, 11
staple fiber: effects of varying yarn count and twist on mechanical properties of 3-denier 2-inch

YARNS (*continued*)
X-51 staple fiber yarn, 193
theory of yarn strength distribution, 289

ZEIN FIBERS: Zein, annotated bibliography, 140 (see also *Vicara, Zycon*)
ZYCON: data sheets, 234
